RE: 2020 Annual Report, dated April 1, 2021
Coliseum Boulevard Plume Site
Alabama Department of Transportation
Project Fund: 348-211-9273

Dear Ms. Little:

Attached are one written copy and one CD of the 2020 Annual Report for the Alabama Department of Transportation (ALDOT) Coliseum Boulevard Plume (CBP) Site. This report documents the continued performance of site response actions involving assessment and remediation of the CBP for calendar year 2020.

If you have any questions or require additional information, please contact Lawson Brown at 334.242.6572.

Sincerely,

Lawson Brown, P.E.
Environmental Services Engineer

1 Introduction

On December 6, 2011, the Alabama Department of Environmental Management (ADEM) and the Alabama Department of Transportation (ALDOT) executed a "Settlement Agreement for Voluntary Response" (the "Agreement') which set out the site response actions for assessment and remediation of the Coliseum Boulevard Plume (CBP), an area in Montgomery, Alabama where the groundwater contains concentrations of trichloroethylene (TCE) (the Site). On March 10, 2015, the Agreement was revised and updated to document the implemented remedial responses and monitoring activities approved by the ADEM. The Agreement requires ALDOT to operate and maintain approved Corrective Measures at the Site, conduct comprehensive monitoring of groundwater and surface water, and report annually the status and results of all investigations and corrective measures. Reports and plans prepared by the ALDOT, and approved by ADEM to document CBP activities, are shown on Figures 2-1A and 2-1B. In June 2019, ALDOT submitted proposed revisions to the Long-Term Monitoring Plan to ADEM. Based on ADEM comments, a revised plan and technical memorandum were submitted to ADEM on April 17 and July 10, 2020 and ADEM issued a "Letter of Concurrence" on September 11, 2020. The Agreement has been modified to reflect the revised plan and incorporated into a modification to the Agreement that was placed on Public Notice and finalized in 2021.

This 2020 Annual Report presents data collected and analyzed, and the status of engineering and institutional controls, in calendar year 2020.

2 Institutional Controls

In July 2009, ADEM approved an Institutional Control Program (ICP) as one component of a comprehensive remedial and management plan to be implemented within the Institutional Control Boundary (ICB) of the CBP. This plan was revised by ALDOT in September 2014 and approved by ADEM on November 25, 2014, contingent on a 45-day public notice. The ICB defines the total area of the 2006-delineated area of TCE in groundwater, the additional area predicted to become affected from horizontal expansion of the plume by calendar year 2036, plus an additional 100 feet. The ICP combines legal, administrative and outreach components, (i.e., non-engineering components) designed to prevent or minimize human exposure to groundwater within the ICB. Reports and plans prepared by ALDOT, and approved by ADEM to document CBP activities, are shown on Figures 2-1A and 2-1B. A revision to the ICP was submitted to ADEM in October 2016 and the ICP was revised in November 2017 based on ADEM comments. The revised ICP was approved by ADEM in its letter dated May 29, 2018.

2.1 Permanent Deed Restrictions

The primary legal component of the ICP is a permanent deed restriction for each parcel of real property within the ICB. The restriction prohibits access and/or use of groundwater associated with the parcel without the express approval of ALDOT (hereinafter "Deed Restriction"). Deed Restrictions for some ICB properties were conveyed to ALDOT as part of a court-approved settlement of legal proceedings, and Deed Restrictions for other properties not included in the referenced legal proceedings have been obtained by private treaty agreements ("Covenants") between the property owner and ALDOT. After execution by the property owner and/or his legal representative and conveyance to ALDOT, the document describing the Deed Restriction for each property has been recorded in the official land records maintained in the Office of the Judge of Probate (OJOP) of Montgomery County. There, the Deed Restriction, which expressly provides that the encumbrance "runs with the land" in perpetuity, is indexed to provide legal notice of the groundwater access/use restriction to anyone having a present or future legal interest in the subject parcel of real property.

The ICB contained 2,198 parcels of real property at the time it was originally established in 2006. Taking into account subsequent splitting and/or merger of specific parcels between 2006, 2013, and 2017, i.e., the year the most recent parcel data was obtained, and ALDOT's acquisition of two (2) parcels of property adjacent to the Southwest Treatment Area in 2014 (which are now included in the ICB), the ICB contains 2,188 parcels of real property. The parcel count is two (2) parcels more than 2019 due to two (2) parcels splitting from previously existing ICB parcels. To date, Deed Restrictions have been executed, recorded and indexed in the OJOP for 2,162 parcels within the ICB (almost 99% of the individual parcels of real property within the ICB and almost 99% of the total acreage of the ICB).

A list of properties within the ICB that have a recorded Deed Restriction that prohibits access/use of groundwater without ALDOT approval is provided on Table A1 in Appendix A.1. The parcel count within the

ICB is updated periodically. A summary of the 2020 parcel count reconciliation is provided as Table A3 in Appendix A.1

2.2 City of Montgomery Ordinance

On May 17, 2016, the City Council of the City of Montgomery adopted ordinance 22-2016**,** which became effective following a public notice on May 26, 2016. The ordinance was specifically written to prohibit drilling of wells in the area of the Coliseum Boulevard Plume, by making it unlawful for any person or entity to dig or drill any well or otherwise access the groundwater within the institutional control boundaries of the Coliseum Boulevard Plume without the expressed, written approval of the City. A copy of the ordinance is included in Appendix A.2. This ordinance provides a restriction on all public-use property (such as City Streets) and the properties on which a restrictive covenant has not been recorded.

2.3 Institutional Control Program Activities in 2020

During 2020, no additional Deed Restrictions on access/use of groundwater were executed. Surface water elevation restrictions on ponds in parcels of property abutting the Southwest Treatment Area (SWTA) and immediately west of the ICB were obtained in 2014. Pursuant to these restrictions, the surface water elevation in the ponds cannot be lowered below 130.00 feet above mean sea level (ft. amsl) without approval by ALDOT (see Appendix A.3). In addition, ALDOT continued on-going review of land transaction records involving properties within the ICB to ensure continued enforcement of the recorded Deed Restrictions.

2.4 Efforts to Obtain Deed Restrictions on Properties Not Presently Subject to a Groundwater Access/Use Deed Restriction

As previously noted, ALDOT has obtained and recorded Deed Restrictions on almost 99% of the properties within the ICB (see Table A1 in Appendix A.1). A list of properties within the ICB for which ALDOT has not obtained an executed Deed Restriction is provided in Table A2 in Appendix A.1.

The parcels for which ALDOT has obtained the Restrictive Covenants within the ICB are shown on Figure A in Appendix A.1. As of December 31, 2020, 26 properties do not have a restrictive covenant executed (see Table A2 in Appendix A.1). The referenced City Ordinance now covers these properties. Since ALDOT has made significant effort for many years to execute a covenant on each property, ALDOT included a revision to the Institutional Control Plan to discontinue efforts to obtain Restrictive Covenants on those specific properties. The revised ICP was approved by ADEM on May 29, 2018. If an owner of a property without an executed Restrictive Covenant contacts ALDOT, ALDOT will execute the Covenant and compensate the owner in the same manner as other previously executed properties. In addition, ALDOT will contact the Department of Revenue if a property is transferred to the Department of Revenue through a tax sale. The Department of Revenue will contact ALDOT and execute a covenant for that property.

2.5 Efforts to Maintain Enforceability of Deed Restriction

ALDOT monitored documents related to the sale, transfer and/or mortgage of properties within the ICB and other records of legal process at the OJOP, Montgomery County Tax Assessor's Office (MCTA) and the United States Bankruptcy Court to identify actual or contingent transfers of ownership of ICB properties and to assess whether the legal transfer document(s) to a "new owner" was properly cross-indexed at the OJOP to the previously recorded and indexed Deed Restriction applicable to the property. To facilitate this determination, ALDOT conducted the following tasks:

2.5.1 Transfer of Ownership by Deed

a. For each ICB property for which a transfer of ownership by deed occurred in 2020, ALDOT reviewed the deed recorded at OJOP to ascertain whether the 2020 deed was properly cross-indexed to the Deed Restriction prohibiting groundwater access/use that was previously indexed against the previous deed(s) for the property (See ICP Form 1B, Appendix B);

b. Created and provided to OJOP a list of ICB properties for which a transfer of ownership by deed occurred in 2020 that denoted the street address and OJOP file stamp designation (i.e., date, book and page number in land records) for the previously recorded and indexed ICB Deed Restrictions for each transferred property. This was done to ensure that the OJOP would have all information needed to cross-index a Deed Restriction to the new document of ownership recorded for the subject parcel of property. See ICP Forms 1A and 1B, Appendix B;

c. In or around July 2020 and January 2021, ALDOT provided written, express notice of the Deed Restriction for a specific ICB property to the person/entity who took ownership of an ICB property during the preceding six months of 2020 (see ICP Forms 2A and/or 2B in Appendix C).

2.5.2 Transfer of Ownership by Foreclosure

a. ALDOT searched OJOP records and legal notices published in the Montgomery Advertiser and the Montgomery Independent to identify foreclosures of properties within the ICB during 2020;

b. Reviewed OJOP records of each identified foreclosure to determine if the foreclosure deed, when recorded, was properly cross-indexed to the Deed Restriction;

c. Created and provided to OJOP a list of ICB properties foreclosed in 2020, denoting the street address and OJOP file stamp designation (i.e., date, book and page number in land records) for the previously recorded and indexed ICB Deed Restrictions for each foreclosed property. This was done to assure that

OJOP would have all information needed to cross-index the Deed Restriction to the new deed resulting from foreclosure;

d. Provided to each individual or entity taking ownership of a foreclosed ICB property in 2020, a written, express notice of the applicable Deed Restriction for the property;

e. Provided written, express notice of the applicable Deed Restriction to the attorney representing the foreclosing party involved in the transfer of ownership of an ICB property that was foreclosed in 2020. Such notice was sent in conjunction with the semi-annual and annual reviews typically issued in or around July 2020 and January 2021;

f. Documented the foreclosure review findings for ICB properties. See ICP Forms 1A, 1B in Appendix B, and 2A, 2B, 2C and 2D in Appendix C.

2.5.3 Transfer from Bankruptcy

a. ALDOT searched the Public Access to Court Electronic Records (PACER) database to identify individuals with a pending bankruptcy case who held ownership interest in an ICB property;

b. Identified the bankruptcy trustee and attorney of debtor;

c. Provided each with express, written notice of the Deed Restriction applicable to a property listed as an asset of the debtor's bankruptcy estate. This express notice was sent in or around July 2020 and January 2021 in conjunction with the semi-annual and annual reviews conducted in the six months preceding the July or January notice date. The bankruptcy review results are provided on ICP Forms 1A and 1B in Appendix B, and Forms 3C, 3D, 3E and 3F, in Appendix C.

2.6 Notifications and Review

ALDOT continued efforts to assure there was no unauthorized access to groundwater within the ICB during 2020. Pursuant to that effort, ALDOT maintained contact with agencies and organizations responsible for monitoring and/or issuance of permits to those entities or individuals who gave notice of intent to drill wells or perform activities that could reasonably result in contact with groundwater within the CBP. This information is documented on Form 4 in Appendix C, and the list of organizations and contacts is included in Appendix C. Additionally, annual notices to stakeholders (Appendix C Forms 8A and 8B) were mailed in October 2020. Findings for 2020 are presented in Sections 2.6.1 through 2.6.9.

2.6.1 Alabama Geological Survey

Activity: Contacted Ms. Ann Arnold, who manages the "Notification of Intent to Drill a Water Well and Certification of Completion" forms for the Alabama Geological Survey. Ms. Arnold reviewed her records of these forms for 2020 and did not identify any proposed wells in the Institutional Control Boundary.

Finding: No new wells proposed or constructed within the ICB.

2.6.2 Alabama Department of Environmental Management

Activity: Contacted ADEM to obtain Intent to Drill forms submitted to ADEM.

Finding: ADEM did not provide any forms for 2020.

2.6.3 City of Montgomery Plumbing, Gas, and Mechanical Department

Activity: Based on the passage of City Ordinance 22-2016, the City will not permit a well in the Coliseum Boulevard Plume area without express approval from the City. The City's Plumbing, Gas, and Mechanical Department, reviews application for approval to drill within the City of Montgomery which encompasses all of the ICB. A GIS layer has been added to the City Permit System to alert the City if a well is proposed in the CBP. The City Plumbing Department is aware that no wells are to be permitted for drilling within the CBP without approval of ALDOT.

Finding: There was no application for drilling a new well within the ICB during calendar year 2020.

2.6.4 Contact with Registered Well Drillers and Pool Installers

Activity: In November and December 2020, notification letters (see Appendix C, Forms 9 and 10) were sent to well drillers registered with the State of Alabama and pool installers to inform them of the CBP and the Deed Restrictions that prohibit access to groundwater within the ICB without express approval of ALDOT. The letter also invited comments or questions. Copies of the notification letters were provided to ADEM.

Finding: ALDOT responds to comments and questions from registered well drillers and pool installers as needed.

2.6.5 Summary of Findings

Based on review of known private, state and municipal sources of information regarding intent to drill and construct water wells, no water wells were constructed within the ICB in 2020.

2.6.6 Aerial Photography Survey

Activity: In 2020, Google Earth Pro® was used to review publicly available satellite imagery (image dated April 2020. Additionally, the National Agriculture Inventory Program (NAIP) Aerial Photomosaic of Montgomery County, Alabama (image dated April 2019) was reviewed.

Finding: No new structures were noted within the review of the aerial images.

2.6.7 Water Well Inspections and Surveys

Activity: ALDOT has conducted frequent and on-going vehicular reconnaissance of roads and streets throughout the ICB for environmental monitoring and well-maintenance activities. A more focused, comprehensive reconnaissance was completed in November 2020 to supplement ALDOT's on-going observations of the ICB for possible unpermitted water wells. Southern Earth Sciences (SES) representatives visited nine (9) parcels listed in ALDOT records where inactive water wells were reported. The visits were intended to confirm the presence of a well and to determine if the well was active or inactive. Letters were mailed to property owners at each address where a suspect unused well was present. (See Form 11 in Appendix C).

Findings: There were no activities observed during the reconnaissance of the ICB area that could reasonably result in access to groundwater. All historically observed wells remained as previously observed with no indication of usage. The irrigation well at the Bama Budweiser facility has not been used. The covenant on the property prohibits use without prior authorization from ALDOT.

2.6.8 Utility Notifications (Alabama 811 Call)

Activity: SES, contractor to ALDOT, subscribed to Alabama One Call (Alabama 811) in September 2010 to receive Alabama One Call notices of excavation or drilling. Alabama One Call notifies SES of utility location requests to excavate or drill within the ICB based on a geographic information system (GIS) shapefile of the area of the ICB. Alabama One Call information is recorded on Form 6, Appendix C. Table 2-1 provides a listing of the notifications and findings of notifications are presented on the following page.

Finding:

In calendar year 2020, 629 notices of excavation within the general area of the ICB were received through the Alabama 811 Call program.

Ninety four (94) notices were outside the ICB. No follow-up communication was made to the party giving notice of an excavation for those locations.

The remaining five hundred thirty five (535) One Call notifications of excavations within the ICB (hereinafter "Caller") were reviewed to determine whether there was the potential for access to groundwater at the excavation site. Callers were placed into either Group A or Group B. Group A included planned excavations which ALDOT determined were not likely to encounter groundwater. Group B identifies excavations where access to groundwater could potentially occur.

Five hundred nineteen (519) Callers were placed in Group A. Examples of this type of excavation included cable installation where the maximum depth of excavation was one foot or less, or construction of a fence or deck where the excavation was a post hole or support with a maximum depth of 3 feet.

There were 16 calls placed in Group B in 2020, i.e., excavations that could potentially access groundwater.

ALDOT emailed or attempted to telephone each Caller and provided information of the approximate depth to groundwater at the work site and the CBP website address to obtain further information about the CBP.

An example notification response is provided on Form 6 in Appendix C. All Form 6 notifications are provided in PDF on the compact disc (CD) included with this report.

2.6.9 Area Reconnaissance & New Construction

Activity: ALDOT continued its on-going program to make periodic observations throughout the ICB to identify activities that may result in changes in land cover from development, construction, or other activities that could reasonably result in access to groundwater. (See Form 7, Appendix C)

The City added a notification flag to the City GIS-system for properties in the ICB and developed a procedure to notify ALDOT when a building permit application is submitted within the ICB. This automated notification system became operational in December 2015. In March 2016, representatives of ALDOT met with the City to explain the purpose of checking the building permits and set up an email notification process. The permit staff has access to a map with a GIS layer showing the Coliseum Boulevard Plume. If a permit comes in for that area, they will notify ALDOT

and place a 48-hour hold on the permit, unless the permittee can demonstrate that they have an 811 ticket. ALDOT will review the proposed project to ensure proper notices are given and contact the permittee directly, if needed. Patrick McGilberry with the City Building Department was contacted and he confirmed that the Notice procedure was in effect.

Findings: Minor land use changes occurred along Lower Wetumpka Road. A vacant lot and a former residence were converted to light commercial use (retail store). No consequential changes in land cover, land use, storm-water conveyances, demolitions, or major modifications to the land were observed or identified in the building permit applications that could reasonably result in access to groundwater. The City of Montgomery permitting staff is included on the stakeholders list to receive the monthly newsletter to promote awareness.

3 Corrective Measures Effectiveness

3.1 Monitoring

Surface water and groundwater monitoring documentation, as defined in Sections VIII.E and VIII.F of the Agreement are included on the CD with this 2020 Annual Report.

The following monitoring activities were performed in 2020:

3.1.1 Surface Water

Surface water was monitored in the areas listed below at the following required frequencies:

Sample Areas	Location Identification	Sample Frequency	Table Reference	Figure Reference
Kilby Ditch / Low-Lying Area (LLA)	Effectiveness Locations: LLA-1 through LLA-11	Quarterly	Table 3-1a	Figure 3-1
	Compliance Point: Low-Lying Compliance Point (LLCP) -1	Every two weeks	Table 3-1b	
Three Mile Branch (TMB)	Monitoring Locations: TMB-1, TMB-2, and TMB-3	Quarterly	Table 3-3	
Bama Bud (BB)	Monitoring Location: BB	Quarterly		
Southwest Treatment Area	Effectiveness Locations: Southwest Area (SWA) -1 through SWA-4	Quarterly	Table 3-2a	Figure 3-2
	Compliance Point DSN001	Every two weeks	Table 3-2b	
Off-Site Locations	Monitoring Locations Offsite O1 (01) and Floodgate (FG) Note: Monitoring location FG is at the former DSN001 location.	Voluntary Quarterly	Table 3-2c	Figure 3-2
City of Montgomery Zoo	Monitoring Locations Zoo Pond (ZP) and Zoo Ditch (ZD)	Quarterly	Table 3-3	Figure 3-3

2020 Water Sampling Results

Kilby Ditch / Low-Lying Area

TCE surface water concentrations collected during 2020 were reviewed. Concentrations were within the expected range of concentrations.

In the Low-Lying Area, TCE concentrations in samples from Low-Lying Area (LLA)-1 were detected in one of the four samples collected in 2020 at a concentration of 2.5 µg/L. This TCE concentration is representative of Kilby Ditch base flow prior to entering the wetland treatment area. TCE concentrations near the center of the wetland treatment area (LLA-3) and at the point of discharge from the wetland treatment area (LLA-2) were incrementally lower for the same sampling event, with concentrations of 2.0 µg/L and 1.3 µg/L, respectively. The analytical results are shown on Table 3-1a.

Sample locations LLA-9, LLA-10 and LLA-11 are south of North Boulevard and north of the Russell Distribution Facility. Surface water from this area flows under North Boulevard and into the Low-Lying Area and the wetland treatment system. Concentrations at LLA-9 ranged from 12.9 µg/l to 23.2 µg/l, and at LLA-11 ranged from 20.6 µg/L to 32.6 µg/L, which are similar ranges of concentrations measured in 2017 through 2019. Samples were not collected from LLA-10 because that sample location was dry on dates samples were collected in 2020. Downstream of LLA-9, rip-rap was added at LLA-4 in November 2014 to enhance aeration. This additional treatment at LLA-4 is effectively reducing the TCE levels, where the concentrations ranged from 4.2 µg/l to 14.2 µg/l. Surface water samples from locations LLA-8 and LLA-7, which are downstream of LLA-4, contained reduced concentrations of TCE due to stream channel turbulence/aeration generated by J-Hooks and Cross-Vanes installed in the Lower Kilby Ditch (Figure 3-1 and Table 3-1a).

LLA-5 and LLA-6 are in the interceptor trench in the northern portion of the Low-Lying Area. TCE was not detected in water samples from LLA-5, located furthest upstream in the interceptor trench. TCE was detected in LLA-6, at the point the trench discharges to the ditch. TCE concentrations at this location were within the range of concentrations detected at immediately upstream and downstream locations in the ditch (LLA-8 and LLA-7, respectively), and TCE at this location is backwater associated with flow in the Kilby Ditch and not from groundwater intercepted by the trench.

Surface water compliance point, Low-lying Compliance Point (LLCP) -1, was sampled 27 times in 2020. Of those 27 samples, 17 contained small concentrations of TCE, ranging from 1.2 µg/L to 3.3 µg/L, which is below the allowable monthly average TCE concentration of 37.38 µg/L provided by the Agreement (Table 3-1b). Ten of the 27 samples collected at LLCP-1 were non-detect.

The corrective measures implemented for the Kilby Ditch / Low-Lying Area have intercepted the groundwater within the northeastern portion of the CBP and reduced TCE concentrations below the allowable discharge limit specified in the Agreement.

Southwest Treatment Area

The SWTA is designed to maintain control of the groundwater in the southwest portion of the CBP by capturing the groundwater in the Dewatering Pond and pumping the water through a series of ponds (see Figure 3-2) to allow treatment before final discharge to a natural wetlands and the City of Montgomery's storm water drainage system pursuant to National Pollutant Discharge Elimination System (NPDES) permit AL0081167 issued by ADEM. Water elevation in the Dewatering Pond is controlled by a pump that discharges the impounded water to the Transfer Pond. The Transfer Pond contains two pumps and a junction valve that permits discharge water to flow to the Discharge Pond and/or to the Auxiliary Treatment Basin (ATB). Discharge of water to the ATB will occur only if additional treatment of TCE is necessary or if water storage is needed onsite when the City of Montgomery closes the floodgate. Any water directed from the Dewatering Pond to the ATB will be discharged after treatment in the Transfer Pond. Water from the Discharge Pond is released to flow by gravity to the Discharge Pond Ditch which empties into the natural wetlands, and subsequently to the City of Montgomery's storm water drainage system at the New Town floodgate (Figure 3-2).

Surface water samples were collected at locations Southwest Area (SWA) -1 through SWA-4 (see Figure 3-2) to evaluate the effectiveness of the SWTA corrective measure. In 2020, TCE concentrations in samples from SWA-1 ranged from 2.4 µg/L to 4.3 µg/L. TCE at the Transfer Pond (SWA-2) ranged from 1.4 µg/L to 2.7 µg/L. TCE at the discharge from the wetland treatment system (SWA-4) ranged from non-detect to 1.6 µg/L. These TCE concentrations are a similar range to concentrations measured in 2019. TCE results for all the SWA samples are provided in Table 3-2a.

The SWTA system surface water compliance location is designated as DSN001 under NPDES permit AL0081167. The current NPDES permit was reissued on August 1, 2016 and will expire on July 31, 2021. Compliance samples are collected every two weeks to assess surface water quality. NPDES permit limits are 37.94 µg/L (daily maximum) and 17.47 µg/L (monthly average). TCE was not detected in any of the 27 compliance samples for DSN001 in 2020. Measurements of pH ranged from 6.62 to 7.48 Standard Units. TCE and pH results for DSN001 samples are provided in Table 3-2b.

Surface water sampling downstream from DSN001 is not required by the Agreement, but samples were collected voluntarily from two downstream locations in 2020. Sample location Offsite 1 (O1) near Lower Wetumpka Road was selected as a representative site to evaluate the presence of TCE in water entering the southeast portion of the Natural Wetlands from off-site sources (see Figure 3-2). This portion of the Natural Wetlands also discharges through the New Town floodgate. Sample location Floodgate (FG) is at the New Town floodgate and samples from this location are used to assess water quality from all water that is discharged from the natural wetland to the City of Montgomery's storm water collection ditch. Table 3-2c shows results of surface water samples voluntarily collected from locations O1 and FG and analyzed for volatile organic compounds (VOCs). Benzene and ethylbenzene were present in the first quarter 2020 sample of runoff from off-site sources to the wetlands at sample location O1. Benzene and ethyl benzene were

detected in the first quarter 2020 sample and only benzene was detected in the fourth quarter 2020 sample of off-site runoff at sample location O1. BTEX was non-detect for the remaining quarterly samples from O1. These compounds are not associated with the CBP. No VOCs were detected at the New Town floodgate (FG) discharge.

Based on the sample results collected in 2020, the SWTA corrective measures are successfully controlling and treating TCE in the groundwater captured from the southwest portion of the CBP.

Bama Bud, Zoo Pond, Zoo Ditch and Three Mile Branch

Results of surface water samples from the Bama Bud (BB), Three Mile Branch (TMB) locations, Zoo Ditch (ZD), and Zoo Pond (ZP) are provided in Table 3-3. Surface water sample locations for BB and TMB are shown on Figure 3-1 and sample locations for the ZD and ZP are shown on Figure 3-3. TCE was not detected in any sample collected from BB, TMB, ZD, or ZP.

3.1.2 Groundwater

One hundred (100) wells (Tables 3-4a, 3-4b and Figures 3-4, 3-4a and 3-4b) within the CBP were monitored to evaluate the effectiveness of the corrective measures and compliance with the Agreement:

- Fourteen (14) Boundary Wells (BDY) were monitored for compliance at the perimeter of the ICB in January and July 2020.
- Eighty-four (84) Corrective Measures Effectiveness (EFF) wells were monitored within the ICB in January 2020 and 23 EFF wells were monitored in July 2020 in accordance with the ADEM agreement dated March 10, 2015.
- Two (2) Background Wells (BKG) were monitored in January 2020.
- In addition to the groundwater samples required in the Agreement, ALDOT collected additional samples during the January sampling event as a demonstration project related to purge volumes. A summary of those results was submitted in the Technical Memorandum dated April 2020. Laboratory analytical results are included on the CD with this report.

Average groundwater elevations and flow directions for the first and third quarters are shown on Figures 3-5a and 3-5b, respectively. Average groundwater velocities for 2020 are shown on Figure 3-6. Semi-annual groundwater elevations from wells within the ICB are provided on Table 3-6. TCE concentrations in samples of water from the EFF wells were compared to the Effectiveness Concentrations in Table VIII.3.b of the Agreement to determine if the sample concentrations were below concentrations predicted by the Site Wide numeric model. Trends for EFF wells were also evaluated and presented in Appendix D.

The Groundwater Protection Standard (GPS) in Table VIII.3.a of the Agreement were not exceeded at any of the BDY or BKG wells. Only trace amounts of chloroform were detected in BDY-10, BDY-12, and BDY-14, a common disinfection byproduct found in potable water and wastewater. Boundary well concentrations are reported in Table 3-4a.

An isoconcentration map for TCE is provided for First Quarter 2020 as Figure 3-7. Figure 3-8 presents TCE concentrations for the Third Quarter 2020 sample results. Analytical results of groundwater samples from the Background and Effectiveness Wells are presented in Table 3-4b.

Representative isoconcentration maps could not be produced for other Constituents of Concern (COCs) because of variable and inconsistent detection of COCs in the groundwater samples. Figures 3-9 through 3-26 depict concentration ranges for the other COCs. As a consequence of sample dilution by the laboratory to adjust for higher TCE concentrations, the reporting limit (RL) for some of the other COC sample results was higher than their respective GPS. These results are all interior to the plume in areas where TCE exceeds 100 µg/L, and none are near the ICB. With the exception of monitoring well MW-357, TCE did not exceed the Effectiveness Concentration for any of the effectiveness monitoring wells (see Table 3-4c). MW-357 was monitored quarterly because of this exceedance. Data for MW-357 are summarized in Table 3-4d. MW-357 was constructed within 50-feet of a former production well installed by the City at the Montgomery Zoo in 2004, which was subsequently abandoned and grouted in 2006, upon discovery by ALDOT. The TCE that exceeds the EFF concentration in water samples from MW-357 is attributable to the construction and past operation of the former production well. A discussion of the former Montgomery Zoo production well and occurrences and trends of TCE at MW-357 are presented in Appendix E. MW-357 will be monitored quarterly until TCE is below the Effectiveness Concentration for this well.

The GPS was not exceeded at quantified (measurable) levels for cis-1,2-dichloroethene, vinyl chloride, chloroethane, chloroform, and 1,1-dichloroethane; however, the detection levels for these constituents were greater than the GPS in some samples due to dilution as discussed above and shown on Table 3-4b and corresponding figures.

Four COCs (carbon tetrachloride, 1,1-dichloroethene, methylene chloride, and tetrachloroethylene) were found in groundwater samples from one or more monitoring wells in concentrations that exceed the GPS. However, these COCs were not found in every monitoring well that contains TCE, and when found at all, the concentration(s) of these COCs are significantly less than the corresponding TCE concentrations in the groundwater. Thus, TCE remains the primary COC for the CBP.

3.2 Engineering Controls

3.2.1 Kilby Ditch / Low-Lying Area

Engineering controls in the Kilby Ditch and Low-Lying Area include fencing and installation of rip rap. The fences have locking gates and signs. The rip rap is installed along the channel bottom and lower channel banks in the Kilby Ditch between North Boulevard and the confluence with the West Kilby Ditch underground storm water culverts. These engineering controls, which are generally inspected monthly, remained in good condition throughout 2020. Dates of inspections in 2020 were adjusted slightly due to the COVID State of Emergency, personnel illness, and training of a new inspector.

ALDOT performed several maintenance activities in the Kilby Ditch / Low-lying Area in 2020, including:

- Routine grass mowing and vegetation management;
- Maintenance of access roads;
- Maintenance and repair of fences and gates;
- Maintenance of signs;
- Demolition of beaver dams; and,
- Installation of erosion control applications along the banks of Kilby Ditch.
- Planting of pine trees as a visual shield of the Kilby Ditch from Vista View.

Monthly inspection forms for the Kilby Ditch / Low-Lying Area and the SWTA are provided in Appendix F. Items identified during the inspections that need repair or maintenance, such as, mowing, fencing, locks, signs or vegetation control are scheduled for attention with the ALDOT Equipment Bureau, or Montgomery Area Engineer's Office.

3.2.2 Southwest Treatment Area

Engineering controls in the SWTA include property access restriction along the perimeter of the SWTA and groundwater capture in the southwest portion of the CBP. Specific engineering controls implemented or maintained are:

- A chain-link fence with locking gates surrounds the perimeter of the SWTA. The condition of the entire fence is inspected monthly. Warning signs are posted on the fence.

- The southwest portion of the CBP is captured and controlled by pumping from the Dewatering Pond. During 2020, the measured water level in the Dewatering Pond ranged from 116.9 to 117.1 ft. amsl. This elevation is within 0.1 ft of the measured water level in 2019.
- Water from the Dewatering Pond is pumped to the Transfer Pond.
- Water from the Transfer Pond is pumped to the Discharge Pond and released to flow by gravity via the Discharge Pond Ditch to the naturally occurring wetlands.
- Equipment in the SWTA includes:
    - A pump and floatation barge in the Dewatering Pond and two pumps and a flotation barge in the Transfer Pond.
    - Control panels for the Dewatering Pond pump and the two pumps in the Transfer Pond. The pumps are automatically activated in response to the water level in each of the pond systems.
- Telemetry systems for the Dewatering Pond and Transfer Pond. The telemetry systems record and transmit operating data of the pumps that can be checked remotely to monitor pump operations. The reported discharge from the Dewatering Pond based on the monthly discharge monitoring reports in 2020 is shown below:

Month/Year	Monthly Avg. (in million gallons per day)	Monthly Max (in million gallons per day)	Month/Year	Monthly Avg. (in million gallons per day)	Monthly Max (in million gallons per day)
Jan 2020	0.892	1.296	July 2020	0.953	1.29
Feb 2020	0.952	1.296	Aug 2020	0.990	1.296
March 2020	0.910	1.296	Sept 2020	1.01	1.629
April 2020	0.989	1.296	Oct 2020	0.991	1.296
May 2020	0.939	1.296	Nov 2020	0.988	1.296
June 2020	0.941	1.287	Dec 2020	0.924	1.296

The total estimated annual flow, based on the monthly averages in 2020 for the Discharge Pond, was 349.1 million gallons.

3.3 Effectiveness of Corrective Measures

The groundwater levels and TCE trends demonstrate that the extent of the CBP has decreased by greater than 20 percent following construction and operation of the Southwest Treatment Area, Kilby Ditch, and Low-Lying Area remedial measures.

3.4 Regulatory Review Update

The U.S. Environmental Protection Agency (USEPA) has made technical documents and tools available to support the ongoing development of its Subsurface Vapor Intrusion Guidance. ALDOT used the most recent edition of the USEPA vapor intrusion screening level (VISL) calculator to determine groundwater screening levels for vapor intrusion. The soil vapor study performed by ALDOT in 2002 and 2003 found no significant risk for vapor intrusion. In an October 23, 2013 response to ADEM comments, ALDOT agreed to continue to monitor TCE trends in shallow groundwater for comparison to the concentrations measured in 2002. TCE concentrations in shallow groundwater show an overall decreasing trend. Concentrations of TCE in groundwater samples from monitoring wells screened across the water table are shown in Table 3-5. As part of ALDOT's Annual review in 2019, potential for vapor intrusion was evaluated based on recent USEPA and ADEM guidance. In 2017, ADEM in its Alabama Risk-Based Corrective Action (ARBCA) Guidance Manual (2017) adopted the use of the USEPA VISL calculator to determine groundwater screening levels for vapor intrusion. A technical memorandum was submitted to ADEM with proposed modifications to the Long Term Monitoring Plan in June 2019 to supplement the current vapor intrusion evaluation to include VISL screening. Revisions to reflect ADEM comments were submitted in April and July 2020 and ADEM issued a concurrence letter in September 2020. The revised plan was incorporated into the Agreement which was placed on public notice and finalized in 2021. Evaluation using the VISL will be implemented during the 2021 groundwater monitoring events.

4 Outreach

4.1 Community Outreach

During 2020, the Community Outreach Group (COG) did not meet due to the risks of gathering from COVID-19 and the State-of Emergency issued by the Governor. Each member of the COG was called to discuss on-going and up-coming activities and check in to see if they had comments from their neighbors about the project. Additionally, an email was sent to all of the members with an update about the Long-Term Monitoring Plan revisions and the Public Notice of the Agreement. One of the COG members requested that ALDOT evaluate planting some trees to provide a shield between the Kilby Ditch and the Vista View neighborhood. A number of the holly bushes originally planted for that purpose had not survived due to drought and cold temperatures. In December 2020, ALDOT planted four rows of pine trees in response to the request.

Beginning in December 2020, the stakeholders list was updated for the Coliseum Boulevard Plume with current contact information for email notices about the project.

4.2 Public Meetings, Tours, Presentations, Monthly Newsletter

The Montgomery Area Association of Realtors (MAAR) meeting was conducted virtually on October 20, 2020.

ALDOT sent monthly newsletters by email to interested parties, members of the COG, and other stakeholders in the CBP area. These newsletters provided details about upcoming project activities and notices of upcoming COG meetings. The newsletters are posted and archived on the CBP webpage.

4.3 Information Website and Answering Services

ALDOT promoted, maintained, and monitored the project website and 24-Hour CBP Project Information Line. Calls and email inquiries are returned upon receipt by CBP project staff.

4.4 Public Notices

There were no public notices in 2020.

Notes:

Project Reporting Limit = 1.0 µg/L

ND - Not Detected

NS - Not Sampled, sample location was dry

Samples were analyzed in accordance with Method 8260 outlined in Test Methods for Evaluating Solid Waste Physical/Chemical Methods, EPA, SW-846.
LLA effectiveness locations are shown on Figure 3-1.

Table 3-1b
Results of Analyses in Surface Water from the Low-Lying Area Compliance Point
Trichloroethylene in micrograms/L (µg/L)

Notes:

1 - Voluntary quarterly sampling of surface water flowing into wetlands from Lower Wetumpka Road.

2 - Formerly DSN001 until July 2013. Voluntary quarterly sampling was conducted in 2015.

Project Reporting Limit = 1.0 µg/L

ND - Not Detected

ND[3]= ND (<2.0 µg/L)

NM = Analytes not measured

No constituents of concern as listed in the ALDOT/ADEM Agreement were detected at these locations.

Samples were analyzed in accordance with Method 8260 outlined in Test Methods for Evaluating Solid Waste Physical/Chemical Methods, EPA, SW-846.

O1 and FG are shown on Figure 3-2.

APPENDIX A.2

City of Montgomery
Drilling Restriction Ordinance

ORDINANCE NO. 22-2016

ORDINANCE PROHIBITING DRILLING OF WELLS IN THE AREA OF THE COLISEUM BOULEVARD PLUME

WHEREAS, the City of Montgomery is provided clean, uncontaminated drinking water for all residential and commercial users in the city; and

WHEREAS, the groundwater, i.e., water below the ground surface, in various areas of the City of Montgomery was previously contaminated with one or more chemical pollutants; more specifically, in one area commonly known as the Coliseum Boulevard Plume, as shown in Figure 1; and

WHEREAS, the Coliseum Boulevard Plume is an area where groundwater use and access should be avoided; and

WHEREAS, the City has cooperated with the Alabama Department of Environmental Management and the Alabama Department of Transportation regarding the investigation, remediation and management of the groundwater contamination in the Coliseum Boulevard Plume; and

WHEREAS, the City Council for the City of Montgomery desires to further cooperate with the Alabama Department of Environmental Management and the Alabama Department of Transportation regarding institutional controls for the groundwater contamination in the Coliseum Boulevard Plume; and

WHEREAS, the City Council for the City of Montgomery is empowered to enact ordinances to protect and to promote the general public health and welfare; and

THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF MONTGOMERY, ALABAMA, the following ordinance is hereby adopted:

SECTION 1: It shall be unlawful for any person or entity to dig or drill any well or otherwise access the groundwater within the institutional control boundaries of the Coliseum Boulevard Plume as shown in Figure 1 without the express, written approval of the City.

SECTION 2: This ordinance shall become effective upon passage, approval and publication, or as otherwise provided by law.

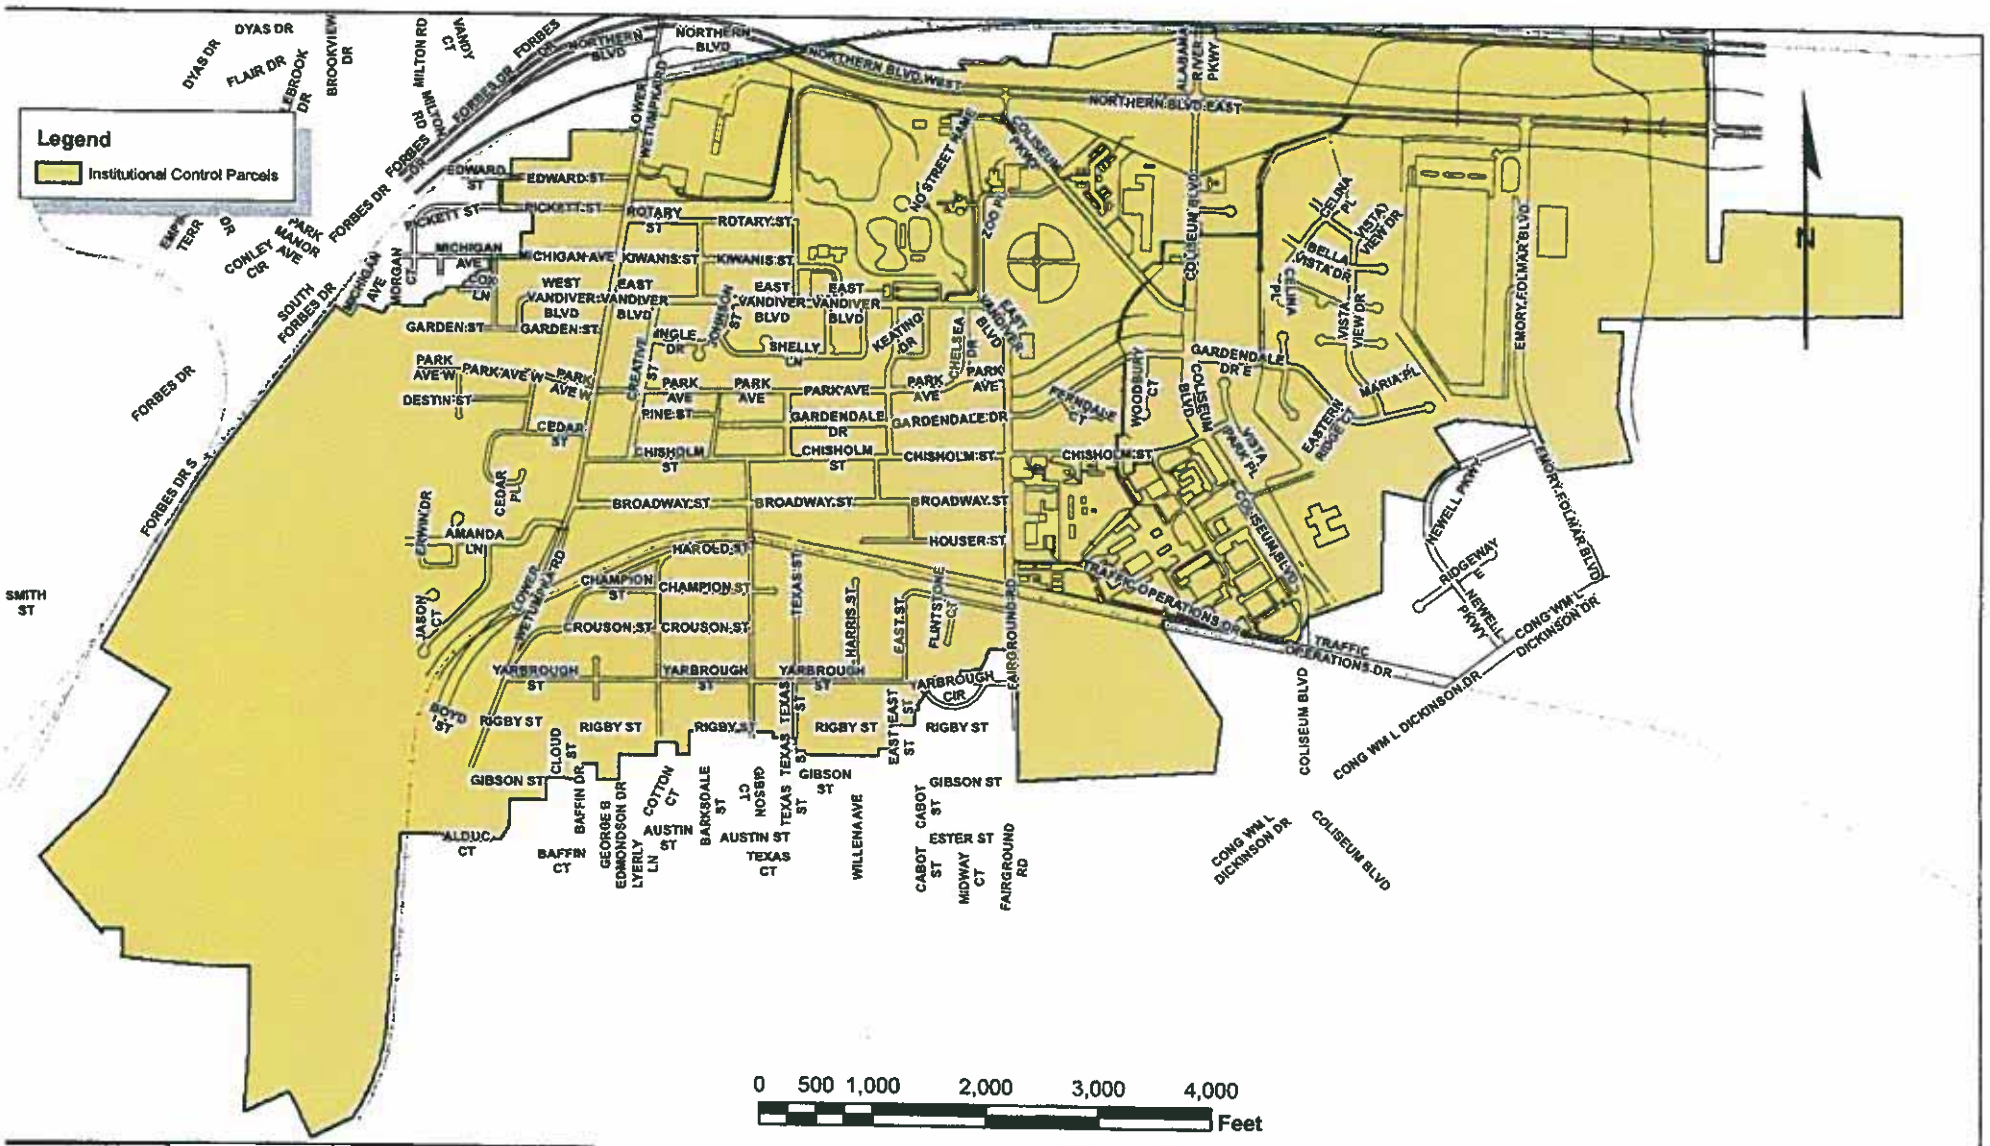

ADOPTED this the 17th **day of** May **, 2016.**

THE STATE OF ALABAMA}
MONTGOMERY COUNTY }

ENVIRONMENTAL COVENANT WITH DEED RESTRICTION, EASEMENT, AND RELEASE TO RUN WITH THE LAND

WHEREAS, Asphalt Contractors, Inc., hereinafter "Grantor" holds legal title in fee simple to certain real properties located in the City and County of Montgomery, Alabama (hereinafter collectively "ACI Properties"), all of which is more particularly and collectively described as:

I

A certain parcel or tract of land lying and being situated in Section 6, Township 16 North, Range 18 East, in the City of Montgomery, Montgomery County, Alabama, and being more particularly described as follows: Starting at the northeast corner of Section 6, Township 16 North, Range 18 East, and thence going westerly along the northerly line of said Section 6, 1328 feet to an iron rail; thence at an angle of 85° 50' to the left, in a southerly direction, 546.15 feet to the point of beginning; thence continuing in a southerly direction 756.35 feet to an iron rail; thence at an angle of 85° 51' to the right in a westerly direction 1153 feet to a point in the easterly line of French Street; thence at an angle of 94° 19' to the right along an extension to said easterly line of French Street northerly 756.35 feet; thence at an angle of 85° 41' to the right in an easterly direction 1150.7 feet to the point of beginning.

Said parcel being more particularly described according to survey by Goodwyn, Mills and Cawood dated January 5, 1994, as follows: That certain 19.934 acre, more or less, tract of land lying in the Northeast Quarter of Section 6, Township 16 North, Range 18 East, all in the City of Montgomery, Montgomery County, Alabama, that is particularly described as follows, to-wit: commence at the northwest corner of said Section 6, thence run South 89° 13' 00" East along the section line for 1334.4 feet to a point 211.8 feet southeasterly from, measured at right angles to, the centerline of CSX Railway Track No. 140, thence turn an angle of 57° 58' to the left and run North 32° 49' East parallel to said track for 834.36 feet to an old 1-1/2" iron pipe; thence urn South 37° 51' 03" East for 447.82 feet to an old iron pipe; thence run South 37° 50' 16" East for 902.86 feet to an old railroad rail; thence run South 05° 08' 31" West for 196.19 feet; thence run South 89° 25' 47" East for 180.59 feet to a metal fence post, the point of beginning; thence run by the following 4 courses and distances clockwise around the perimeter of said site: (1) South 89° 25' 47" East for 1150.91 feet to an iron pipe, (2) South 04° 46' 00" West for 756.35 feet to a concrete monument, (3) North 89° 22' 59" West for 1152.75 feet to a concrete monument, and (4) North 04° 54' 38" East for 755.55 feet to the point of beginning.

II

That certain 23.837 acre, more or less, tract of land lying in the West Half of the Southeast Quarter and the East Half of the Southwest Quarter of Section 31, Township 17 North, Range 18 East in the City of Montgomery, Montgomery County, Alabama, that is particularly described as follows, to-wit: commence at the southwest corner of said Section 31, thence run South 89° 13' 00" East, along the section line for 1334.4 feet to a point 211.8 feet southeasterly from, measured at right angles to, the centerline of CSX Railway Track No. 140, thence turn an angle of 57° 58' to the left and run North 32° 49' East parallel to said track for 834.36 feet to an old 1-1/2" iron pipe, the point of beginning; thence continue North 32° 49' East parallel to said track for 1749.84 feet to an old iron pipe; thence run South 57° 12' 36" East for 600.22 feet to an old iron pipe; thence run South 32° 50' 16" West for 1118.21 feet to an old iron pipe; and thence run South 45°36'57" West for 800.04 feet to an old iron pipe; thence run North 37° 51' 03" West for 447.82 feet to the point of beginning.

III

That certain 96.400 acre, more or less, tract of land lying partly in the South Half of the Southwest Quarter of Section 31, T17N, R18E, and partly in Northwest Quarter and the North Half of the Southwest Quarter of Section 6, T16N, R18E, all in City of Montgomery, Montgomery County, Alabama, that is particularly described as follows, to-wit: to arrive at the point of beginning commence at the northwest corner of said Section 6, thence run South 89° 13' 00" East along the section line for 1334.4 feet to a point 211.8 feet southeasterly from, measured at right angles to, the centerline of CSX Railway Track No. 140, said point being the point of beginning, thence run by the following 21 courses and distances clockwise around the perimeter of said tract; (1) North 32° 49' 00" East parallel to said tract for 834.36 feet to an old 1-1/2" iron

pipe, (2) South 37° 51' 03" East for 447.82 feet to an old iron pipe, (3) South 37° 50' 16" East for 902.86 feet to an old railroad rail, (4) South 05° 08' 31" West for 299.62 feet to an old railroad rail, (5) South 04° 56' 23" West for 650.54 feet to an old railroad rail, (6) South 05° 14' 28" West for 586.54 feet to an old iron pipe, (7) South 05° 14' 28" West for 310.98 feet, (8) South 04° 57' 42" West for 1060.10 feet to an old 1-1/2" iron pipe, (9) North 89° 17' 13" West for 729.25 feet to a capped 2" iron pipe at the northeast corner of the Alabama Power Co. lot, (10) North 89° 06' 00" West for 97.38 feet, (11) North 07° 09' 43" East for 522.71 feet, (12) North 31° 39' 44" West for 269.10 feet, (13) North 15° 00' 11" West for 153.04 feet, (14) North 60° 32' 32" West for 217.58 feet, (15) North 19° 39' 01" East for 292.77 feet, (16) South 89° 44' 05" West for 522.73 feet to intersect the east margin of Old Shell Road, (17) North 04° 56' 33" East along said margin for 688.78 feet to intersect the south margin of Coyle Street, (18) South 89° 13' 41" East along said margin for 768.28 feet to the east end of said street, (19) North 05° 02' 51" East for 648.1 feet, (20) North 89° 21' 35" West for 769.37 feet to an old railroad rail at the northeast corner of the end of Shell Road, and (21) North 32° 49' 00" East parallel to Track No. 140 for 767.7 feet to the point of beginning; subject to an easement 100 feet in width heretofore granted to the Alabama Power Company and to flowage easements heretofore granted to the United States of America;

As recorded in the Montgomery County Judge of Probate Office at RLPY Book 1450, Page 704.

WHEREAS, the Grantor is aware that the soil and/or groundwater beneath the land and/or surface water on lands adjacent to and/or nearby the ACI Properties is now or may in the future be included in what is generally known as the Coliseum Boulevard Plume ("CBP"), an area in the City of Montgomery that is contaminated by trichloroethylene ("TCE"), its breakdown components and carbon tetrachloride that may have originated on lands owned by the Alabama Department of Transportation, an agency of the State of Alabama, (hereinafter "Grantee"); and

WHEREAS, the Grantee has consented to be responsible for all costs reasonably related to any past or continuing response actions required for management and/or remediation of the CBP, and that incident to said response actions, Grantee has implemented a remediation plan for the southwestern portion of the CBP ("SWTA") on lands owned by Grantee that are adjacent to the above-described ACI Properties; and

WHEREAS, portions of the above-described ACI Properties include three (3) surface water impoundments, which along with the associated banks and roads, are described hereinafter as "Surface Water Impoundments" (see Exhibit A, attached hereto), each of which is more particularly described as:

SURFACE WATER IMPOUNDMENT NO. 1

Commence at a concrete marker known as the Northeast Corner of Section 6, T-16-N,R-18-E, Montgomery County, Alabama, thence S 89°16'38" W 17.24' to an iron pin; thence S 88°46'14" W 99.81' to an iron pin; thence S 89°14'24" W 1,211.78' to an iron pin; thence S 03°13'20" W 545.53' to an iron pin; thence S 03°17'49" W 757.69' to a concrete marker; thence S 89°09'36" W 57.08' to an iron pin and the POINT OF BEGINNING for the herein described parcel of land; thence S 89°09'36" W 1,095.76' to an iron pin; thence N 03°27'36" E 716.00' to an iron pin; thence N 88°26'52" E 117.71' to an iron pin; thence S 88°46'17" E 234.60' to an iron pin; thence S 85°15'45" E 217.48' to an iron pin; thence S 81°10'37" E 150.25' to an iron pin; thence S 88°59'57" E 390.40' to an iron pin; thence S 01°39'50" W 560.81' to an iron pin; thence S 23°49'52" W 96.64' to an iron pin and the point of beginning. Containing 17.56 acres, more or less, and lying in and being a part of the NW 1/4 of the NE 1/4 of Section 6, T-16-N, R-18-E, Montgomery County, Alabama.

SURFACE WATER IMPOUNDMENT NO. 2

Commence at a concrete marker known as the Northeast Corner of Section 6, T-16-N, R-18-E, Montgomery County, Alabama, thence S 89°16'38" W 17.24' to an iron pin; thence S 88°46'14" W 99.81' to an iron pin; thence S 89°14'24" W 1,211.78' to an iron pin; thence S 03°13'20" W 545.53' to an iron pin; thence S 03°17'49" W 757.69' to a concrete marker; thence S 89°09'36" W 1,152.84' to an iron pin; thence S 89°39'17" W 180.81' to an iron pin; thence N 76°52'44" W 89.26' to the POINT OF BEGINNING for the herein described parcel of land (said point located on the shoreline of an existing lake); thence along said shoreline of lake the following seventy-nine (79) courses: (1) S 20°09'09" E 57.50'; (2) S 04°31'34" W

Commence at a concrete marker known as the Northeast Corner of Section 6, T-16-N, R-18-E, Montgomery County, Alabama, thence S 89°16'38" W 17.24' to an iron pin; thence S 88°46'14" W 99.81' to an iron pin; thence S 89°14'24" W 1,211.78' to an iron pin; thence S 03°13'20" W 545.53' to an iron pin; thence S 89°02'15" W 1,150.87' to a steel post; thence N 03°18'42" E 246.12' to an iron pin; thence S 89°37'35" W 179.23' to an iron pin; thence S 03°24'22" W 51.35' to a railroad iron; thence N 39°21'46" W 703.09' to an iron pin and the POINT OF BEGINNING for the herein described parcel of land; thence S 44°02'50" W 228.79' to an iron pin; thence N 58°41'06" W 560.20' to an iron pin located on the East side of CSX Railroad Track No. 140; thence along said East side of CSX Railroad Track No. 140 N 31°18'54" E 2,187.41' to a steel post; thence leaving said East side S 58°42'20" E 168.35' to an iron pin; thence S 48°30'51" E 58.10' to an iron pin; thence S 55°39'11" E 149.59' to an iron pin; thence S 73°48'19" E 33.54' to an iron pin; thence N 84°04'37" E 15.72' to an iron pin; thence S 58°42'20" E 180.38' to an iron pin; thence S 31°27'14" W 1,118.16' to an iron pin; thence S 43°49'20" W 799.93' to an iron pin; thence S 39°21'46" E 197.50' to an iron pin and the point of beginning. Containing 28.24 acres, more or less, and lying in and being a part of the East 1/2 of the SW 1/4, the West 1/2 of the SE 1/4, all in Section 31, T-17-N, R-18-E, Montgomery County, Alabama.

WHEREAS, Grantor understands that a significant reduction in surface elevation of any of the above-described Surface Water Impoundments could cause significant instability of the banks of the Surface Water Impoundment(s) and have a negative impact on the effectiveness of the CBP remediation plan; and

WHEREAS, that for and in consideration of the sum of One Dollar and no/100 ($1.00) in cash paid by the Grantee to the Grantor, plus other good and valuable consideration, the receipt whereof is hereby acknowledged, and in further consideration of the mutual benefits accruing to the Grantor and the Grantee by the investigation and remediation of the CBP, and pursuant to the *Alabama Environmental Covenant Act* (*Code of Alabama* 1975, §§ 35-19-1 to 35-19-14), the Grantor does grant, bargain and convey unto the Grantee and/or its successor agency the following:

1. A Deed Restriction that runs with the land in perpetuity on the portions of the ACI Properties that comprise one or all of the above-described Surface Water Impoundments, whereby Grantor and/or any successor in interest or bona fide purchaser for value of the ACI Properties or one or any of the above-described Surface Water Impoundments that lies on or within the ACI Properties forever in perpetuity is prohibited from taking any action that will cause the surface water elevation of any of the above-described Surface Water Impoundments to decrease to or below a level of 130.00 ft. above mean sea level ("amsl") without just cause, reasonable notice in writing, consultation with and the prior written consent of the Grantee. Grantee's approval will not be unreasonably denied

so long as Grantee reasonably determines that the final surface water elevation requested by Grantor, and the rate of reduction and/or methodology for accomplishing the lowering of the surface water elevation of the subject Impoundment(s) will not impair the effectiveness of the CBP remediation plan at the SWTA.

2. An Easement to, for and/or across the ACI Properties that runs with the land in perpetuity, whereby the Grantee or its successor agency or agents shall have reasonable access to and right-of-way to, over, on, upon, under, through and across all areas of the Surface Water Impoundments, which shall include the associated roads, banks and other associated areas, except improved appurtenant structures thereon, for purposes of investigation and/or remediation of the CBP ("Activities") which may include, but is not limited to: Inspection and collection of soil, groundwater and/or surface water samples from one or more of the above-described Surface Water Impoundments, which may require and include installation of wells and/or other structures to sample, observe, monitor, observe or measure soils, groundwater or surface water, or drilling to sample and assess the soils and geologic characteristics of the Surface Water Impoundments. Prior to entry, the Grantee and/or its agents will notify the Grantor of the nature of the Activities and determine a mutually convenient time to perform the Activities to avoid or minimize interference with Grantor's business activity and/or Grantor's ordinary use of the Surface Water Impoundments. Grantee will repair any substantive damage to either the improved and/or unimproved portions of the Surface Water Impoundments incident to the conduct of Grantee or its agents, and make reasonable efforts to return the damaged portion of the Surface Water Impoundment to the condition it was in prior to the conduct of the Activities.

3. A Release of and from any and all claims, demands, causes of action, suits at law or in equity, losses, damages, and any other claims of any nature which the Grantor may have now or in the future or which any successor in interest or bona fide purchaser for value of any one or more of the ACI Properties may have in the future against Grantee, the State of Alabama, the Alabama Department of Transportation, and/or its Director, officials, and employees, both in their official and individual capacities, and their agents, representatives, assigns or successors in interest arising from or related to, either directly or indirectly, the alleged presence of TCE, its breakdown components and carbon tetrachloride in the soil and/or groundwater and/or surface water on and/or beneath the ACI Properties.

To Have and to Hold the same unto the said Grantee, the Alabama Department of Transportation, an agency of the State of Alabama, its Director, employees, successors and assigns, for the uses and purposes for which said Environmental Covenant with Deed Restriction, Easement and Release To Run With The Land ("Covenant"), a legal instrument executed pursuant to the Alabama Uniform Environmental Covenants Act (Code of Alabama 1975, §§ 35-19-1 to 35-19-14), is granted, now and forever more, unless and until expressly waived and released by the Grantee, and it is expressly understood and intended that the said Covenant is intended to be and shall run with the ACI Properties and shall be perpetual and binding on any successive owner, lessee, invitee or licensee of the ACI Properties.

In Witness Whereof, the said Grantor(s), Asphalt Contractors, Inc., has signed and sealed these presents on this 25th day of August, 2014.

GRANTOR:

ASPHALT CONTRACTORS, INC.

By: Charles L Brassell
Name: CHARLES L. BRASSELL
Its: PRESIDENT

STATE OF ALABAMA
COUNTY OF MONTGOMERY

I, G. Barton Crum, a Notary Public, in and for said State and County, hereby certify that Charles L. Brassell whose name as President of Asphalt Contractors, Inc. an Alabama corporation, is signed to the foregoing instrument, and who is known to me, acknowledged before me on this date that he is fully authorized to act on this matter on behalf of said Asphalt Contractors, Inc., and being informed of the contents of the above and foregoing instrument, he, as such officer and with full authority, executed the same voluntarily for and as the act of said corporation on the day the same bears date.

Given under my hand and official seal of office this the 25th day of August, 2014.

Re: Notice of Covenant on [Property Address], Montgomery, AL 36110

You are receiving this letter because records at the Montgomery County Probate Office and the Montgomery County Tax Assessor's office indicate that you have become an owner of the property at [Address of Property]. This property is located in an area known as the Coliseum Boulevard Plume (CBP), an area where the groundwater contains trichloroethylene (TCE), a common solvent that leaked from the sewer system into the groundwater near the Alabama Department of Transportation (ALDOT) asphalt test facility. To prevent exposure to the groundwater (the water 10-50 feet or more below land surface), ALDOT obtained a Covenant on this property that restricts access and use of the groundwater beneath the property without the express approval of ALDOT, and provides an easement for ALDOT to come onto the property for its work incident to investigation and remediation of the CBP. The Covenant is recorded and cross-indexed to the deed to this property at the Montgomery County Probate Office.

If, at any time, you wish to make an excavation on your property that may cause contact with the groundwater beneath the property, please contact the CBP Program Administrator to discuss your plans. If you sell your ownership interest in the property, please ensure that the new owner is given appropriate notice of the Covenant, and make sure that any deed to the property includes an appropriate reference to the Covenant.

The CBP website at www.coliseumboulevardplume.com provides detailed information about the CBP. If you have questions about the CBP or the Covenant, you may call the CBP 24-hour information line at (334) 353-6635, email us at cbpinfo@dot.state.al.us or contact the CBP Program Administrator at (866) 488-1126 or Brandi Little with the Alabama Department of Environmental Management at (334) 274-4226.

Very truly yours,

Program Administrator

Re: Notice of Covenant on [Property Address], Montgomery, AL 36110

You are receiving this letter because records at the Montgomery County Probate Office and the Montgomery County Tax Assessor's Office indicate that you represented a secured party in a transfer of ownership interest in the real property at [Address of Property]. This property is located in an area known as the Coliseum Boulevard Plume (CBP), an area where the groundwater contains trichloroethylene (TCE), a common solvent that leaked from the sewer system into the groundwater near the Alabama Department of Transportation (ALDOT) asphalt test facility. To prevent exposure to the groundwater (the water 10-50 feet or more below land surface), ALDOT obtained a Covenant on this property that restricts access and use of the groundwater beneath the property without the express approval of ALDOT, and provides an easement for ALDOT to come onto the property for its work incident to investigation and remediation of the CBP. The Covenant is recorded and cross-indexed to the deed to this property at the Montgomery County Probate Office.

If you represent a party in any future ownership transfers for this or other real properties in the CBP, please ensure that the new owner is given appropriate notice of the Covenant and the permanent deed restrictions, and make sure that any deed to the property includes an appropriate reference to the Covenant.

The CBP website at www.coliseumboulevardplume.com provides detailed information about the CBP. If you have questions about the CBP or the Covenant, you may call the CBP 24-hour information line at (334) 353-6635, email us at cbpinfo@dot.state.al.us or contact the CBP Program Administrator at (866) 488-1126 or Brandi Little with the Alabama Department of Environmental Management at (334) 274-4226.

Re: Notice of Covenant on [Property Address], Montgomery, AL 36110

It is my understanding that you have been appointed as Trustee in Bankruptcy Case No. [Case Number], presently pending in the U.S. Bankruptcy Court for the Middle District of Alabama. It is also my understanding that a parcel of real property located at **[**Address of Property] may be part of the bankruptcy estate. This property is located in an area known as the Coliseum Boulevard Plume (CBP), an area where the groundwater contains trichloroethylene (TCE), a common solvent that leaked from the sewer system into the groundwater near the Alabama Department of Transportation (ALDOT) asphalt test facility. To prevent exposure to the groundwater (the water 10-50 feet or more below land surface), ALDOT obtained a Covenant on this property that restricts access and use of the groundwater beneath the property without the express approval of ALDOT, and provides an easement for ALDOT to come onto the property for its work incident to investigation and remediation of the CBP. The Covenant is recorded and cross-indexed to the deed to this property at the Montgomery County Probate Office.

If the bankruptcy estate's ownership interest in the above-referenced real property is transferred to a new owner, please ensure that the new owner is given appropriate notice of the Covenant and the permanent deed restrictions, and make sure that any deed to the property includes an appropriate reference to the Covenant.

The CBP website at www.coliseumboulevardplume.com provides detailed information about the CBP. If you have questions about the CBP or the Covenant, you may call the CBP 24-hour information line at (334) 353-6635, email us at cbpinfo@dot.state.al.us or contact the CBP Program Administrator at (866) 488-1126 or Brandi Little with the Alabama Department of Environmental Management at (334) 274-4226.

Re: Notice of Covenant on [Property Address], Montgomery, AL 36110

It is my understanding that you represent the Debtor in Bankruptcy Case No. [Case Number], presently pending in the U.S. Bankruptcy Court for the Middle District of Alabama. It is also my understanding that a parcel of real property located at [Address of Property] may be part of the bankruptcy estate. This property is located in an area known as the Coliseum Boulevard Plume (CBP), an area where the groundwater contains trichloroethylene (TCE), a common solvent that leaked from the sewer system into the groundwater near the Alabama Department of Transportation (ALDOT) asphalt test facility. To prevent exposure to the groundwater (the water 10-50 feet or more below land surface), ALDOT obtained a Covenant on this property that restricts access and use of the groundwater beneath the property without the express approval of ALDOT, and provides an easement for ALDOT to come onto the property for its work incident to investigation and remediation of the CBP. The Covenant is recorded and cross-indexed to the deed to this property at the Montgomery County Probate Office.

If the bankruptcy estate's ownership interest in the above-referenced real property is transferred to a new owner, please ensure that the new owner is given appropriate notice of the Covenant and the permanent deed restrictions, and make sure that any deed to the property includes an appropriate reference to the Covenant.

The CBP website at www.coliseumboulevardplume.com provides detailed information about the CBP. If you have questions about the CBP or the Covenant, you may call the CBP 24-hour information line at (334) 353-6635, email us at cbpinfo@dot.state.al.us or contact the CBP Program Administrator at (866) 488-1126 or Brandi Little with the Alabama Department of Environmental Management at (334) 274-4226.

Very truly yours,

Program Administrator

[City, State and Zip Code of Bankruptcy Attorney]

Re: Notice for [Property Address], Montgomery, AL 36110

It is my understanding that you represent the Debtor in Bankruptcy Case No. [Case Number], presently pending in the U.S. Bankruptcy Court for the Middle District of Alabama. It is also my understanding that a parcel of real property located at [Address of Property] may be part of the bankruptcy estate. This property is located in an area known as the Coliseum Boulevard Plume (CBP), an area where the groundwater contains trichloroethylene (TCE), a common solvent that leaked from the sewer system into the groundwater near the Alabama Department of Transportation (ALDOT) asphalt test facility. To prevent exposure to the groundwater (the water 10-50 feet or more below land surface), ALDOT is obtaining environmental covenants (Covenant) on properties in the CBP that restricts access and use of the groundwater beneath the property without the express approval of ALDOT, and provides an easement for ALDOT to come onto the property for its work incident to investigation and remediation of the CBP.

ALDOT will pay the owner of each property or other authorized person a fee in exchange for the Covenant. If your client is authorized to execute a Covenant, we would like to discuss the CBP and the Covenant terms with you and your client. Please call the Program Administrator at (866) 488-1126 or (334) 202-3355. Also, if you represent a party in a future transfer of ownership of a property in the CBP for which a Covenant has been executed, please ensure that the new owner is given appropriate notice of the Covenant and the permanent deed restrictions, and make sure that any deed to the property includes an appropriate reference to the Covenant.

The CBP website at www.coliseumboulevardplume.com provides detailed information about the CBP. If you have questions about the CBP or the Covenant, you may call the CBP 24-hour information line at (334) 353-6635, email us at cbpinfo@dot.state.al.us or contact the CBP Program Administrator at (866) 488-1126 or Brandi Little with the Alabama Department of Environmental Management at (334) 274-4226.

Very truly yours,

Program Administrator
Coliseum Boulevard Plume

FORM 4

PURPOSE: Review groundwater files at Alabama Department of Environmental Management, Geological Survey of Alabama, and City of Montgomery

Action upon completion of form: Transmit to ALDOT project manager and database manager within 24 hours.

FORM 7 Quarterly Institutional Controls Inspection

PURPOSE: Quarterly institutional-control inspection

Action upon completion of checklist: Transmit completed form to ALDOT project manager and database manager within 5 days

DATE OF INSPECTION (MM/DD/YYYY):	Quarter 1: January - March 2020
PERSON(S) PERFORMING INSPECTION: (signature / print)	Southern Earth Sciences Staff / Steve Kelly/Eric Guarino

INSPECTION ITEM	AREA / LOCATION	OBSERVATIONS
Changes in land cover	January - March	No changes in land cover have been observed that would be expected to have a material impact to the CBP. Land cover changes are observed through frequent monitoring events at the site.
Changes in land use	SWTA January - March	No changes in land cover have been observed that would be expected to have a material impact to the CBP. Land cover changes are observed through frequent environmental monitoring and well maintenance activities.
Changes in storm water conveyances	January - March	No changes noted in storm water conveyance. Numerous beaver dams constructed and typically removed by ALDOT and/or SESI personnel. Monitoring to determine if off site sources are impacting SWTA are ongoing.
Construction	January - March	SESI is operating and maintaining the automated pumping system and continues efforts to control beaver dams at various locations throughout the SWTA.
Demolition	-	No demolitions projects were observed that would be expected to impact the CBP.
Major modification of land	SWTA	No major modifications of land to Southwest Treatment Area except as noted.
New Subdivisions	January - March	No new subdivisions are known to have begun development within the ICB.
New commercial/industrial developments	January - March	ALDOT contractors/ consultants now periodically review copies of building permits issued until such information is made available through the City GIS system.

FORM 7 Quarterly Institutional Controls Inspection (Page 2 of 2)

PURPOSE: Quarterly institutional-control inspection

Action upon completion of checklist: Transmit completed form to ALDOT project manager and database manager within 5 days

DATE OF INSPECTION (MM/DD/YYYY):	January - March 2020
PERSON(S) PERFORMING INSPECTION: (signature / print)	Southern Earth Sciences Staff

Examine Suspect Wells listed in the Well Inventory

Location (street address)	
ICP Streets	An annual sampling event was conducted during the month of January.
	No water supply wells were observed during the January monitoring event.
Notes:	

FORM 7 Quarterly Institutional Controls Inspection

PURPOSE: Quarterly institutional-control inspection

Action upon completion of checklist: Transmit completed form to ALDOT project manager and database manager within 5 days

DATE OF INSPECTION (MM/DD/YYYY):	Quarter 2: April - June 2020
PERSON(S) PERFORMING INSPECTION: (signature / print)	Southern Earth Sciences Staff / Steve Kelly/Eric Guarino

INSPECTION ITEM	AREA / LOCATION	OBSERVATIONS
Changes in land cover	April - June	No changes in land cover have been observed that would be expected to have a material impact to the CBP. Land cover changes are observed through frequent monitoring events at the site.
Changes in land use	SWTA April - June	No changes in land cover have been observed that would be expected to have a material impact to the CBP. Land cover changes are observed through frequent environmental monitoring and well maintenance activities.
Changes in storm water conveyances	April - June	No changes noted in storm water conveyance. Numerous beaver dams constructed and typically removed by ALDOT and/or SESI personnel. Monitoring to determine if off site sources are impacting SWTA are ongoing.
Construction	April - June	SESI is operating and maintaining the automated pumping system and continues efforts to control beaver dams at various locations throughout the SWTA.
Demolition	-	No demolitions projects were observed that would be expected to impact the CBP.
Major modification of land	SWTA	No major modifications of land to Southwest Treatment Area except as noted.
New Subdivisions	April - June	No new subdivisions are known to have begun development within the ICB.
New commercial/industrial developments	April - June	ALDOT contractors/ consultants now periodically review copies of building permits issued until such information is made available through the City GIS system.

FORM 7 Quarterly Institutional Controls Inspection (Page 2 of 2)

PURPOSE: Quarterly institutional-control inspection

Action upon completion of checklist: Transmit completed form to ALDOT project manager and database manager within 5 days

Form 8A – LETTER TO STAKEHOLDERS

Date:
Address To:
Reference: Alabama Department of Transportation
Coliseum Boulevard Plume Institutional Control Program

The shallow groundwater (the water 10-50 feet or more below land surface) in an area in north Montgomery, Alabama (see attached map) contains concentrations of trichloroethylene ("TCE"). The area is commonly referred to as the Coliseum Boulevard Plume ("CBP").

TCE is a common solvent often used in testing laboratories. Investigations of the CBP showed that waste TCE from an asphalt test facility of the Alabama Department of Transportation ("ALDOT") leaked into the groundwater after it was discarded in the sewer system and/or the ground near the facility in accordance with manufacturer's recommendations. To prevent exposure to the groundwater, ALDOT obtained from CBP property owners environmental covenants ("Covenants") that contain a permanent deed restriction that prohibits access and use of the groundwater (for example, drilling a well or installing a swimming pool) without approval of ALDOT. The Covenants are recorded at the office of the Montgomery County Judge of Probate. Pursuant to the Alabama Uniform Environmental Covenant Act (Alabama Code §35-19-1, *et seq.*), the Alabama Department of Environmental Management ("ADEM"), is also authorized to enforce the deed restrictions on groundwater access and use. (*See* ADEM Admin. Code 335-5-1, *et seq.*).

If you have a project that will require you to drill or excavate in the CBP area at depths that may result in contact with groundwater, please contact ALDOT prior to the start of the project. We will promptly respond to discuss your project. If you confirm that your project may result in contact with the groundwater, we can provide information that may help you protect your workers and others from TCE exposure and prevent TCE contamination from entering the deeper aquifers. Also, we will send you periodic updates about the CBP as part of our on-going effort to involve and inform the community.

For more information about the CBP, you may visit our website at www.coliseumboulevardplume.com. If you have any questions or comments about the CBP, call the CBP 24-Hour Information Line (334-353-6635), email us at cbpinfo@dot.state.al.us or contact Adam Anderson with ALDOT at 334-206-2278 or Brandi Little with ADEM at (334) 274-4226.

Sincerely,

Scott W. George, P.E.
Materials and Tests Engineer

Form 8B – STAKEHOLDERS ACKNOWLEDGEMENT

Acknowledgement of Receipt

[Addresee]:

Please distribute the enclosed letter within your organization to all persons who may have work responsibilities related to matters of interest to the management and remediation of the Coliseum Boulevard Plume (CBP) area.

Sign below to acknowledge receipt of the enclosed letter and return only this page to the Program Administrator in the enclosed envelope by December 31, [Current Year]. We appreciate your cooperation so that we can ensure our records are complete and current.

If you would like future notices to be directed to a specific person, to a different person or to be sent to additional parties, please provide the information below. Monthly updates will be sent to the email addresses provided, therefore, please provide email addresses for everyone in your organization who should receive the notices.

For more information about the CBP, you may visit our website at www.coliseumboulevardplume.com. If you have any questions or comments about the CBP, call the CBP 24-Hour Information Line (334-353-6635), email us at cbpinfo@dot.state.al.us or contact Adam Anderson with ALDOT at 334-206-2278 or Brandi Little with ADEM at (334) 274-4226.

Thank you,
Program Administrator
Coliseum Boulevard Plume

I have received, read and understand the enclosed letter explaining groundwater restrictions within the CBP. Prior to performing any work that might result in contact with groundwater, I understand that I should contact the Alabama Department of Transportation to discuss the project.

Form 9 – LETTER TO WELL DRILLERS

[Date]

[Name of Well Driller]
[Street Address of Driller]
[City, State, and Zip Code of Well Driller]

Re: Restrictions on Drilling Water Wells within the Coliseum Boulevard Plume

Shallow groundwater in an area in north Montgomery, Alabama (see attached map) contains concentrations of trichloroethylene ("TCE"). The area, commonly referred to as the Coliseum Boulevard Plume ("CBP"), lies within the SW ¼ of Section 27, South ½ of Section 28, South ½ of Section 29, East ½ of Section 31, most of Section 32, and the North ½ of Section 33 of Township 17 North, Range 18East. (See USGS Survey 7½ Minute topographic map.)

The Alabama Department of Transportation ("ALDOT"), incident to its responsibilities for investigation and remediation of the CBP, has implemented an Institutional Control Program ("ICP") to minimize exposure to the groundwater containing TCE and to prevent TCE contamination of deeper groundwater aquifers. As part of the ICP, ALDOT has obtained from property owners legally enforceable environmental covenants that include deed restrictions that prohibit access and use of groundwater beneath their property without prior approval of ALDOT. The environmental covenants are recorded at the office of the Montgomery County Judge of Probate. Pursuant to the Alabama Uniform Environmental Covenant Act (Alabama Code §35-19-1, *et seq.*), the Alabama Department of Environmental Management ("ADEM"), is also authorized to enforce the deed restrictions on groundwater access and use. (*See* ADEM Admin. Code 335-5-1, *et seq.*). The City of Montgomery enacted an ordinance (22-2016) in May 2016, that prohibits drilling of any wells in the Coliseum Boulevard Plume Institutional Control Boundary, without permission from the City of Montgomery.

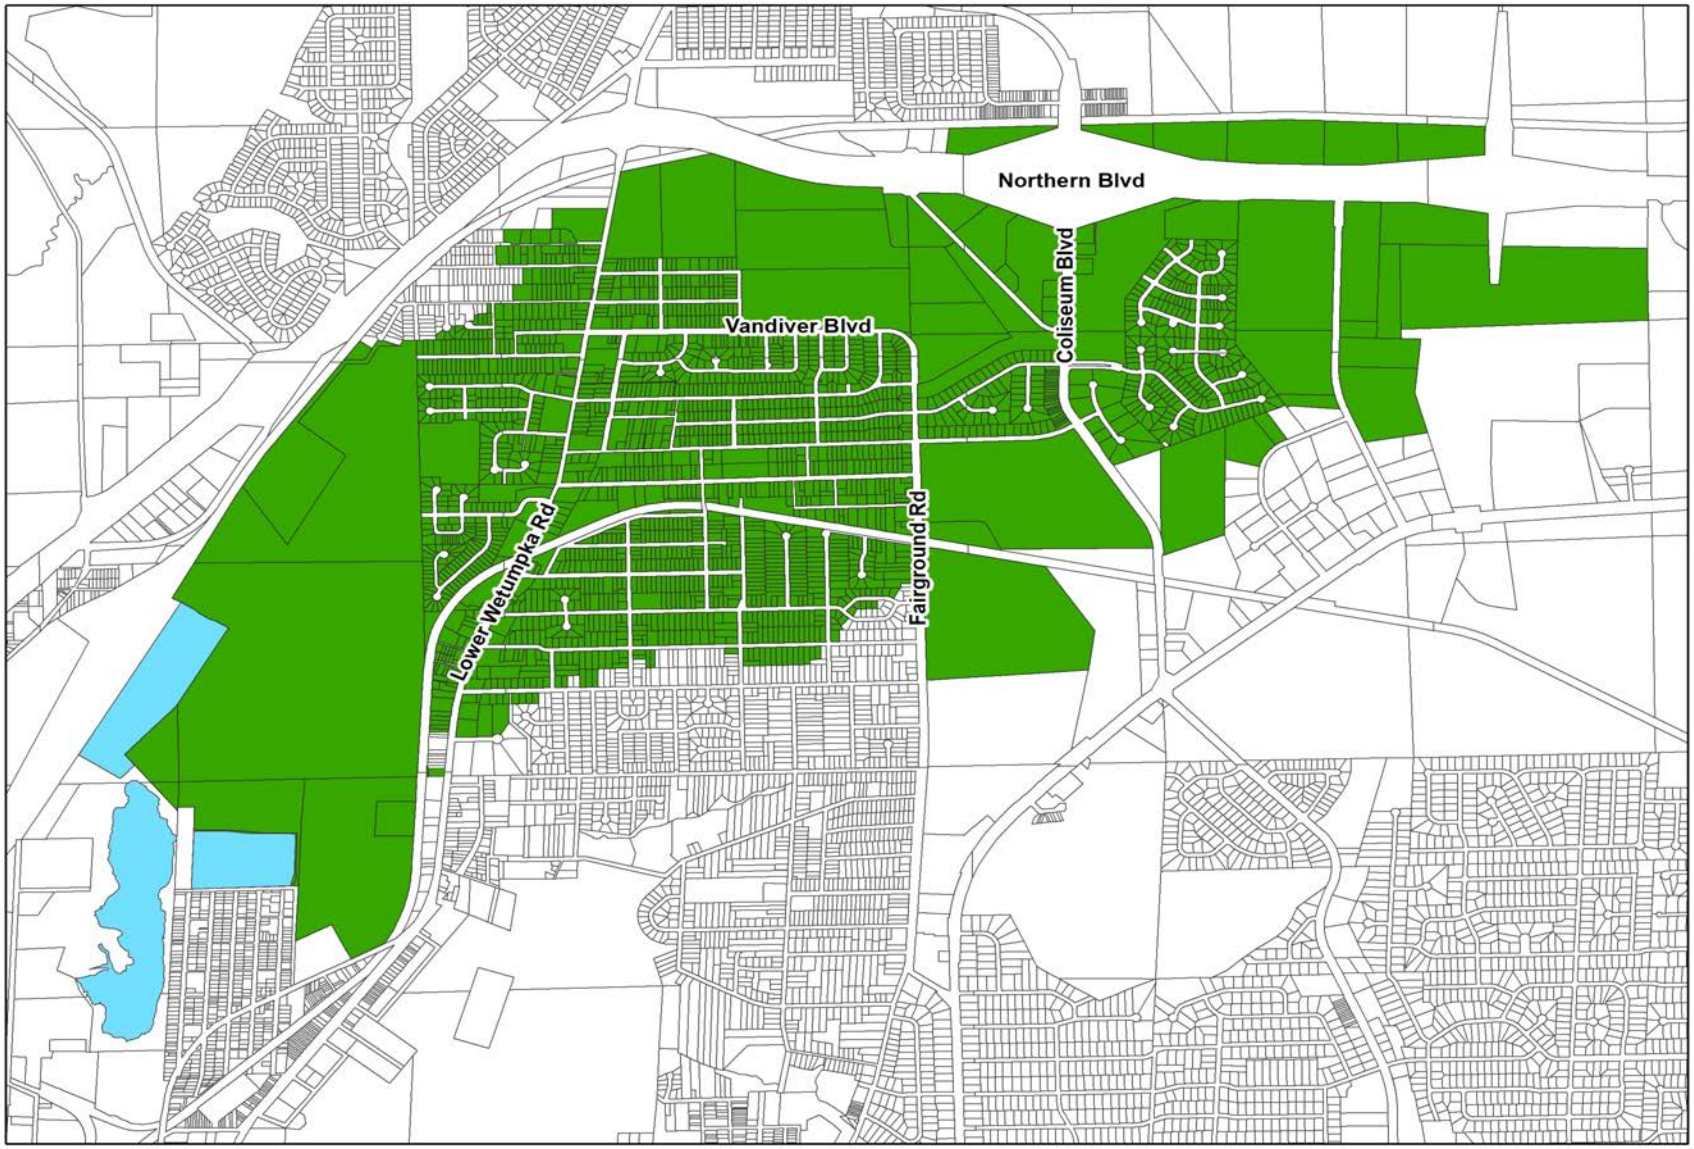

If you have a drilling project in the CBP area, you must contact ADEM, ALDOT and the City of Montgomery prior to drilling. ALDOT will promptly respond to discuss your project and provide you with information so that you can develop a plan to protect you and/or others from TCE exposure and/or to prevent contamination of the deeper aquifers.

For more information, you may see our website at www.coliseumboulevardplume.com, call the CBP 24-Hour Information Line (334-353-6635), email us at cbpinfo@dot.state.us.al or contact Adam Anderson of ALDOT at 334-206-2278 or Shane Brown of ADEM at 334-274-4221.

Very truly yours,

Scott W. George, P.E.
Materials and Tests Engineer

Form 10 – LETTER TO POOL INSTALLERS

[Date]

[Name of Pool Installer]
[Street Address of Pool Installer]
[City, State, and Zip Code of Pool Installer]

Re: Notice of Groundwater Restriction within the Coliseum Boulevard Plume

The shallow groundwater (the water 10-50 feet or more below land surface) in an area in north Montgomery, Alabama (see attached map) contains concentrations of trichloroethylene ("TCE"). The area is commonly referred to as the Coliseum Boulevard Plume ("CBP").

TCE is a common solvent often used in testing laboratories. Investigations of the CBP showed that waste TCE from an asphalt test facility of the Alabama Department of Transportation ("ALDOT") leaked into the groundwater after it was discarded in the sewer system and/or the ground near the facility in accordance with manufacturer's recommendations. To prevent exposure to the groundwater, ALDOT obtained environmental covenants ("Covenants") from CBP property owners that contain a permanent deed restriction that prohibits access and use of the groundwater (such as, for example, drilling a well or installing an in-ground swimming pool) without approval of ALDOT. The Covenants are recorded at the office of the Montgomery County Judge of Probate. Pursuant to the Alabama Uniform Environmental Covenant Act (Alabama Code §35-19-1, *et seq.*), the Alabama Department of Environmental Management ("ADEM"), is also authorized to enforce the deed restrictions on groundwater access and use. (*See* ADEM Admin. Code 335-5-1, *et seq.*).

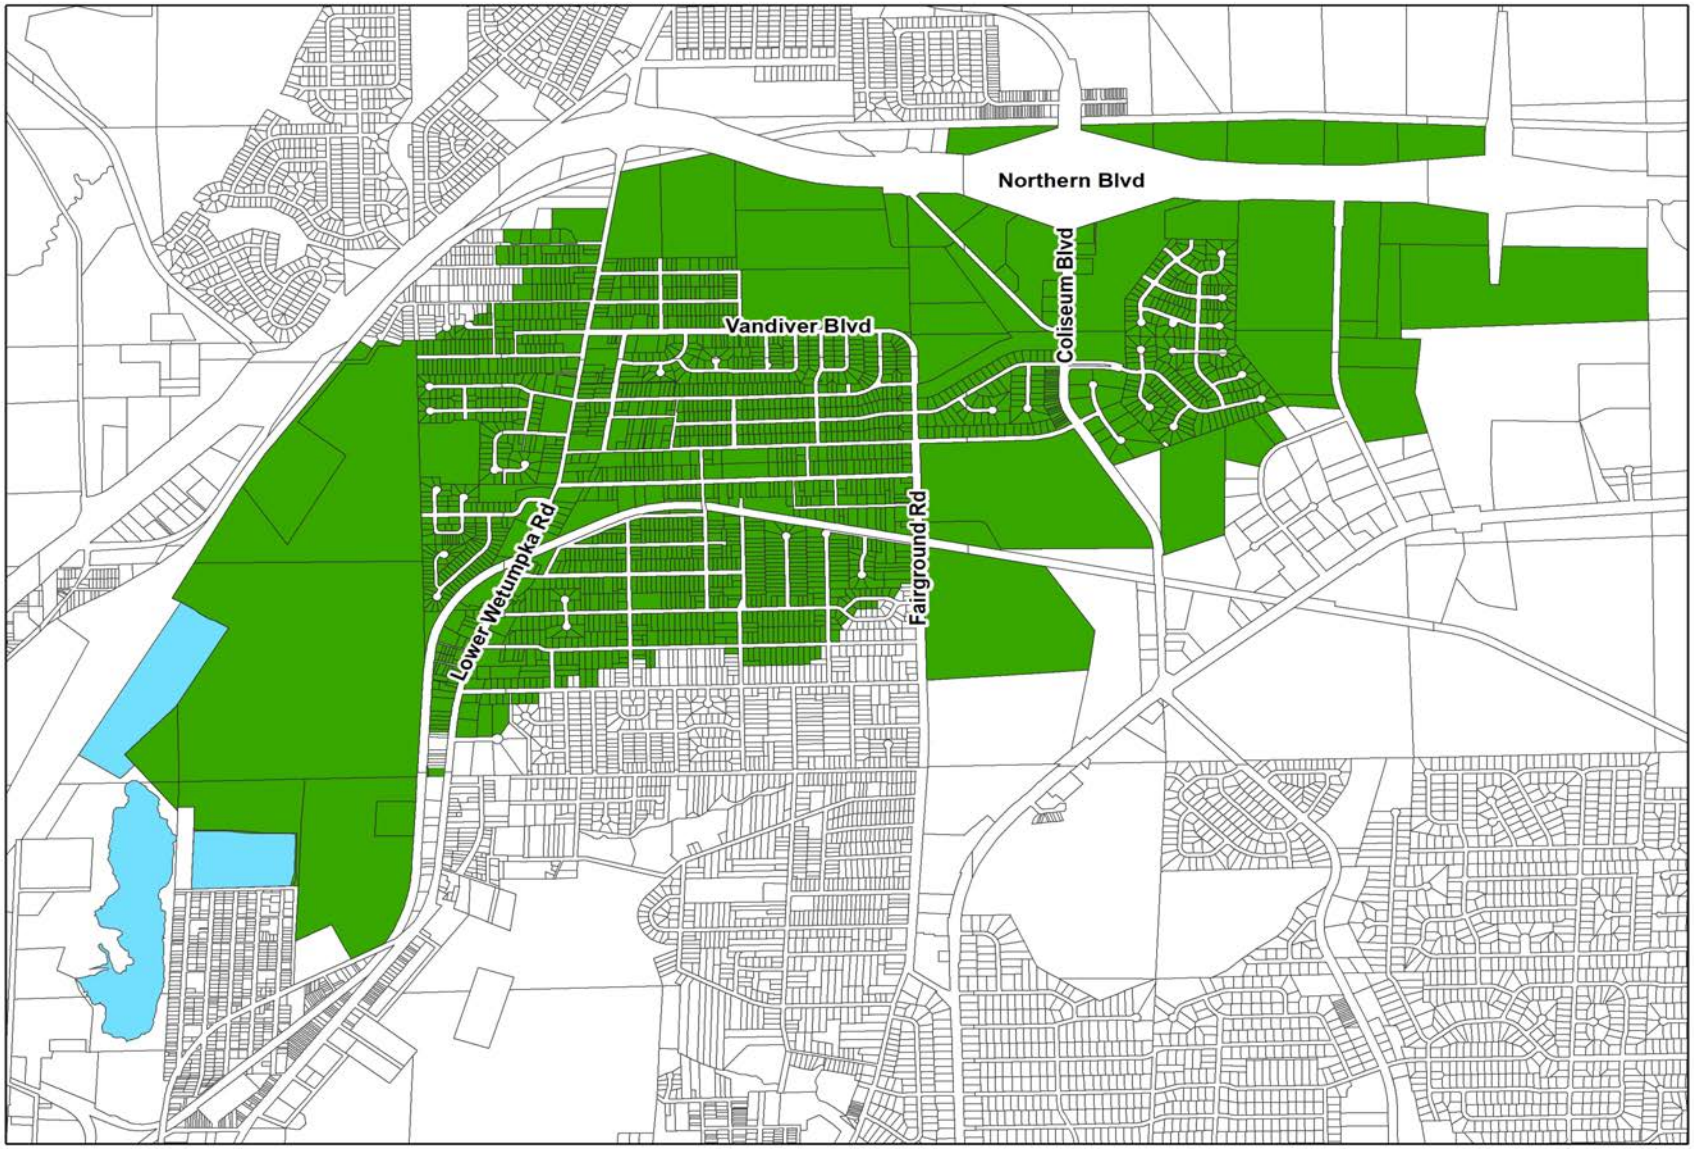

If you install a swimming pool in the CBP area that requires an excavation that may result in contact with the groundwater, please contact ALDOT prior to excavation. We will promptly respond to discuss your project. If you confirm that your project may result in contact with the groundwater, we can provide information that may help you protect your workers and others from TCE exposure and prevent TCE contamination from entering the deeper aquifers. Also, we will send you periodic updates about the CBP as part of our on-going effort to involve and inform the community.

For more information, you may see our website at www.coliseumboulevardplume.com, call the CBP 24-Hour Information Line (334-353-6635), email us at cbpinfo@dot.state.us.al or contact Adam Anderson of ALDOT at 334-206-2278 or Brandi Little of ADEM at (334) 274-4226.

Very truly yours,

Scott W. George, P.E.
Materials and Tests Engineer

Form 11 – PRIVATE WELL PROPERTY OWNERS

[Date]

[Name of Property Owner]
[Street Address of Property Owner]
[City, State, and Zip Code of Property Owner]

Re: Notice of Covenant and Use Restrictions on Private Water Well at [Property Address], Montgomery, AL 36110

Dear [Property Owner Name]:

You are receiving this letter because records at the Montgomery County Probate Office and the Montgomery County Tax Assessor's office indicate that you are an owner of the property at [Address of Property] which is located in an area known as the Coliseum Boulevard Plume (CBP), an area where the groundwater contains trichloroethylene (TCE), a common solvent that leaked from the sewer system into the groundwater near the Alabama Department of Transportation (ALDOT) asphalt test facility.

To prevent exposure to the groundwater, ALDOT obtained a Covenant on this property that restricts access and use of the groundwater beneath the property without the express approval of ALDOT, and provides an easement for ALDOT to enter the property for its work related to the CBP. The Covenant is recorded at the office of the Montgomery County Judge of Probate. The ALDOT has oversight authority regarding wells within the CBP and groundwater within the CBP cannot be used without the express approval of ALDOT. Consequently, access to groundwater through the private well located on your property at [Address of Property] is prohibited.

The CBP website at www.coliseumboulevardplume.com provides detailed information about the CBP. If you have questions about the CBP or the Covenant or have additional information about the well (for example if the well has been closed), you may call the CBP 24-hour information line at (334) 353-6635, email us at cbpinfo@dot.state.al.us or contact the CBP Program Administrator at (866) 488-1126 or Adam Anderson at 334-206-2278.

Very truly yours,

Scott W. George, P.E.

1. Introduction

1.1. Introduction

The Coliseum Boulevard Plume (CBP) Site is an area in north Montgomery, Montgomery County, Alabama that contains trichloroethylene (TCE) in the groundwater. Groundwater samples have been collected from monitoring wells at the CBP Site from 2001 through July 2020 to document TCE concentrations. As part of Long Term Monitoring (LTM), samples were collected from 100 monitoring wells in January 2020 and 35 monitoring wells in July 2020, in accordance with the LTM Plan (September 2014).

To develop valid statistical trends only wells with a minimum of eight sampling events with groundwater samples containing TCE concentrations above the reporting limit are evaluated. 52 wells that met this criterion provide information for qualitative and quantitative statistical evaluations to determine:

- Changes in TCE concentrations throughout the CBP Site.
- Effects of groundwater levels on TCE movement throughout the CBP Site.

Section 2 provides trends in TCE concentrations and effects of groundwater levels on TCE concentrations at the CBP Site. Section 3 presents the findings.

1.2. Purpose

A groundwater model has been developed and calibrated for the CBP to predict changes in TCE concentrations and effects of groundwater levels on TCE movement. The model is also used to evaluate the effectiveness of corrective measures that are used to control, capture and treat TCE. Based on model predictions and review of historical data, TCE concentrations will change within the CBP. Annual TCE trend analyses are useful to verify that the TCE concentrations in groundwater, as determined by routine sampling and analysis, are consistent with model-predicted effectiveness concentrations.

A detailed description of the CBP groundwater model is provided in: “Site-Wide Model”, prepared by the Alabama Department of Transportation (ALDOT), revised 2017 and submitted to ADEM as part of the 2017 Annual Report.

2. Temporal Changes in TCE Concentrations

2.1. Methodology

Time-series plots and intrawell Shewhart-Cumulative Sum (CUSUM) control charts were used to evaluate the trends in TCE concentrations. TCE has been consistently detected only in samples from wells completed in the Shallow Zone (above the First Distinct Clay). Thus, trends are evaluated for only 100- and 200- series wells. The 100- series wells are screened in the upper part of the Shallow Zone (SZ). The 200- series wells are screened in the lower part of the SZ.

2.1.1. Time-series Plots

Time-series plots for both TCE and groundwater levels, presented in Appendix D-1, provide for visual interpretation of trends.

2.1.2. Shewhart-CUSUM Statistical Analysis:

The Shewhart-CUSUM statistical analysis provides two statistics that are based on comparison of recent monitoring results to baseline conditions established from the first four sampling events for each well. The Shewhart statistic represents the "short-term" trend relative to baseline; whereas the CUSUM statistic represents the long-term trend relative to baseline (the CUSUM statistic retains a "memory" of previous values because it is a summed statistic). The numeric values that determine statistical significance for the Shewhart and CUSUM trend methods are provided in Table D2-1.

Table D2-1.
Shewhart-CUSUM Tests for Significant Trend

Statistical Significance	Shewhart Statistic	CUSUM Statistic
Significant Increase	> 4.5	> 5
No Significant Trend	<= 4.5 and >= -4.5	<= 5 and >= -5
Significant Decrease	< -4.5	< -5

2.2. Results

The wells used for the trend analyses are presented on Figure D2-1. Table D2-2 provides a comparison of the Shewart and CUSUM statistics for data from the upper SZ and lower SZ monitoring wells. Statistical analyses for long-term trends (CUSUM statistic) and short-term trends (Shewhart statistic) indicate the following:

CUSUM statistic (long-term trends)

- 63 percent of all monitoring wells evaluated in the trend analysis have either no trend (0%) or a decreasing trend (63%) in TCE concentrations.
- 26 percent of the upper SZ wells (100 series wells) have an increasing trend in TCE concentrations**.**
- 42 percent of the lower SZ wells (200 series wells) have an increasing trend in TCE concentrations**.**

Shewhart statistic (short-term trends)

- 75 percent of all monitoring wells have either no trend (46%) or a decreasing trend (29%) in TCE concentrations.
- 16 percent of the upper SZ wells have an increasing trend in TCE concentrations**.**
- 30 percent of the lower SZ wells have an increasing trend in TCE concentrations**.**

Table D2-2.
Distributions of Trends in TCE Concentrations between Upper and Lower Shallow Zone Wells

Well Screen Interval	Shewhart Statistics				CUSUM Statistics			
	Increase	No Trend	Decrease	Total	Increase	No Trend	Decrease	Total
Upper SZ	16%	37%	47%	100%	26%	0%	74%	100%
Lower SZ	30%	52%	18%	100%	42%	0%	58%	100%
All Wells	25%	46%	29%	100%	37%	0%	63%	100%

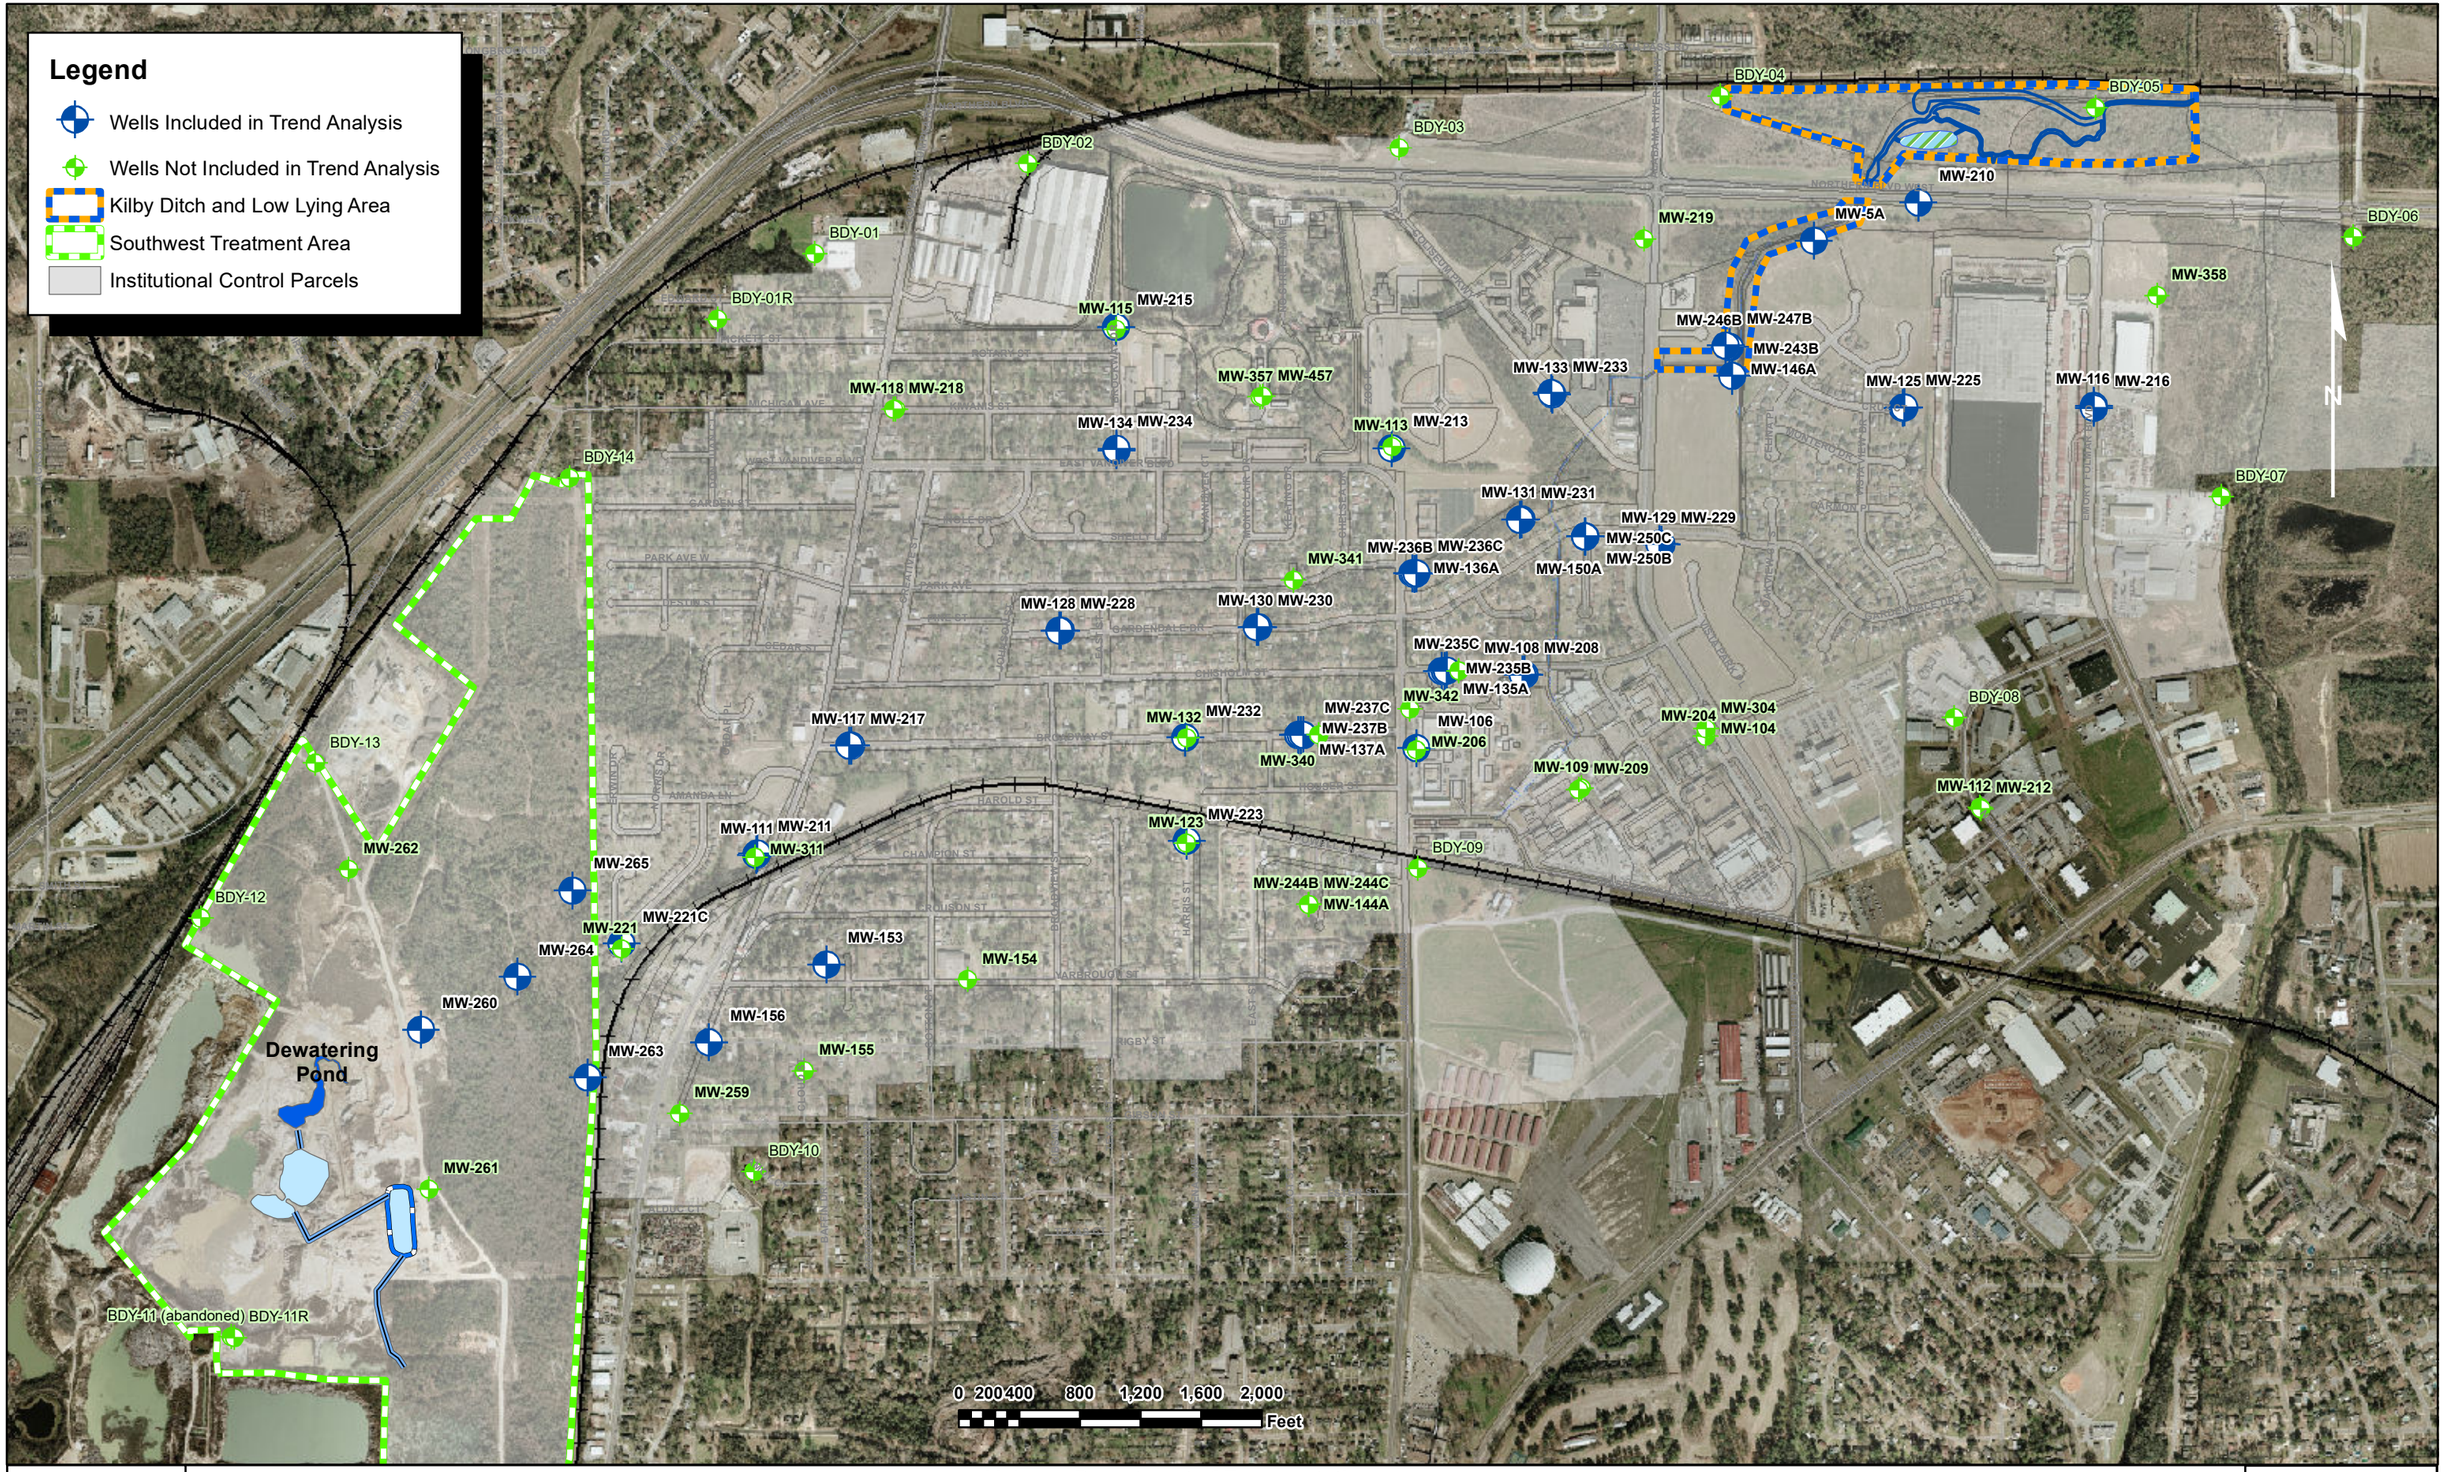

Note: "Increase" and "decrease" are statistically significant trends.

The Shewhart (short-term trend) for each well is presented on Figure D2-2 and the long-term CUSUM statistic for each well is presented in Figure D2-3. The values for the Shewhart and CUSUM statistics are provided in Appendix D-2. The wells with increasing trends in TCE concentrations are found only along the southwest-northeast axis of the CBP (Figures D2-2 and D2-3). This axis coincides with the dominant directions of groundwater flow established by the Treatment Areas. All the wells outside the dominant southwest-northeast groundwater flow directions have either no trend or decreasing trends. Wells located at the groundwater divide (except for MW-236C and MW-208) also have no trend or decreasing trends. This distribution in trends is consistent with changes in TCE predicted by the site wide model.

3. Findings

- Of the wells from which water samples contained TCE, 63 percent are lower SZ wells. Recharge from precipitation to the top of the aquifer causes stratification of TCE such that higher concentrations are near the base of the aquifer.
- Site wide, most groundwater samples from the wells exhibit TCE trends that are either decreasing or have no significant change. The trends coincide with the trends predicted by the numeric groundwater site-wide model.
- Increasing trends in TCE concentrations in groundwater samples from wells are along the southwest-northeast axis of the CBP, which coincides with the dominant directions of groundwater flow
- TCE concentrations in groundwater samples from all wells outside the dominant southwest-northeast groundwater flow direction or most wells located along the groundwater divide have either no trend or decreasing trends.

APPENDIX E

MW-357 Action Plan

Monitoring Well MW-357 (City of Montgomery Zoo)

MW-357 is one of two clustered monitoring wells installed March 2006 in response to the discovery and subsequent abandonment of a production well on the City of Montgomery Zoo property in 2006 (Figure E-1). MW-357 is screened across a thin, isolated, sand lens near the top of the Gordo Confining Unit beneath the First Distinct Clay. The other monitoring well, MW-457, is screened within the underlying Gordo Aquifer.

From the time of installation to January 2010, TCE concentrations in groundwater samples from MW-357 did not exceed 5 µg/L. From January 2010 to January 2011, TCE concentrations in groundwater samples increased to a maximum 103 µg/L in January 2011 followed by a decreasing trend through January 2016. TCE concentrations from January 2016 through October 2017 have exhibited an increasing trend from 5.7 µg/L in January 2016 to 87.1 µg/L in October 2019 (see Figure E-2). Over the 2020 period, TCE levels have not increased above 2019 levels and have stabilized with concentrations fluctuating between 55 µg/L and 80 µg/L. As described below, temporary increasing TCE trends as observed from January 2016 through October 2019 were anticipated but an overall long term downward trend is expected. Additional samples will be collected In accordance with the Long Term Monitoring Plan.

The most likely source of the TCE is from the former Zoo production well that allowed groundwater from the overlying Shallow Zone to enter the isolated sand lens immediately beneath the First Distinct Clay (See Figure E-3). Abandonment of the production well in March 2006 effectively removed this pathway from the Shallow Zone to the Confining Unit, however, during operation of the well, it is unknown how much TCE containing groundwater was pulled down into this Confining Unit. Additionally, because the Zoo well operated only when needed, the TCE was not pulled into this Confining Unit at one time, rather, the TCE was pulled into the Confining Unit intermittently, whenever the pumping stopped. Thus, the overall increasing trends followed by decreasing trends represent different periods of the Zoo well operation. The cyclic increasing and decreasing trends are expected to continue until TCE levels return to below 5 µg/L.

Information related to the transport pathway for TCE in groundwater from the Shallow Zone to the Confining Unit and lateral movement within the Confining Unit to MW-357 is summarized below and illustrated on Figure E-3:

- *Montgomery Zoo Production Well Construction and Operation*
  - Constructed in August 2004 and abandoned in March 2006.
  - Screen Intervals (see "*Summary Report for the Abandonment and Installation of wells at the Montgomery Zoo*", 2006 for details):
    - 20 to 60 feet BGS (both Shallow Zone and Gordo Confining Unit).
    - 120 to 160 feet BGS (Gordo Aquifer).
  - Sand Pack / Grout unknown.
  - Used intermittently for irrigation. When used, pumped at 100 gpm.
  - 41.4 µg/L TCE in a sample of discharge water collected prior to abandonment.

        - The TCE was a blended concentration of groundwater from the Shallow Zone and the Gordo Aquifer.
    - Production well abandoned in March 2006 with bentonite by over drilling the original well to 145 feet BGS and grouting with bentonite to the surface.
- *Monitoring Well MW-357*
    - *Constructed March 2006, approximately 50 feet from the abandone*d production well
    - Screen Interval: 54.5 to 63.5 ft BGS (sand pack 51.6 – 64.8 ft BGS)
    - Bentonite / Grout: surface to 51.8 ft BGS
    - TCE trends presented on Figure E-2.
    - Lithology screened by well:
        - 2 ½ foot thick, fine to medium sand near top of screen
        - intervening clayey, silty, sand
    - Overlying and underlying the screen interval is sandy clay
- *Monitoring Well MW 457*
    - Constructed March 2006, approximately 50 feet from the abandoned production well
    - Screen Interval: 122.85 to 147 ft BGS (sand pack 119.8 – 149.5 ft BGS)
    - Bentonite / Grout: surface to 119.8
    - TCE has not been detected in samples from March 2006 to January 2020
    - Lithology screened by well: fine to coarse sand and layers of sand and gravel
- *Transport of TCE from the Shallow Zone to the isolated sand lens within the Gordo Confining Unit (Figure E-3, left panel):*
    - Pumping dewatered the isolated sand lens and produced a strong downward hydraulic gradient from the Shallow Zone to the isolated sand lens within the Confining Unit.
    - Once the production well ceased pumping, vertical flow between the Shallow Zone and Confining Unit persisted until the isolated sand lens was re-saturated and hydraulic levels equalized.
    - Cyclic pumping resulted in alternating introduction and removal of TCE from the Shallow Zone to the isolated sand lens. During pumping phases, some TCE remained behind in pore water after the sand lens was dewatered. The TCE that remained behind in pore water during the alternate periods of pumping is responsible for the periodic increasing followed by decreasing TCE trends observed at monitoring well MW-357.
    - Abandonment of the production well in March 2006 removed the vertical flow.
- *Transport of TCE within the isolated sand lens within the Gordo Confining Unit (Figure E-3, right pane):*
    - Return to the "natural" hydraulic gradient results in minor advective movement of the residual TCE within the isolated sand lens.
    - Well purging and sampling for MW-357 induces a temporary artificial gradient from the abandoned production well site toward MW-357.
    - Quarterly sampling of MW-357 from March 2006 to January 2010 gradually moved TCE from the vicinity of the abandoned production well to MW-357.
    - Since the peak in TCE concentrations in January 2011, overall trends decreased followed by a recent increase, reflecting heterogeneity in the TCE concentration distribution that

resulted from the intermittent operation of the Zoo well. TCE for 2018 through 2020 have fluctuated between 51 µg/L and 87.1 µg/L. Over the 2020 period, TCE levels have stabilized with concentrations fluctuating between 55 µg/L and 80 µg/L.

With TCE concentrations currently stabilized between 55 µg/L and 80 µg/L, quarterly monitoring for MW-357 will continue for 2021.
